INFORMAȚII GENERALE

Acele instrumentelor au scopul să vă informeze cu privire la utilizarea corectă a produselor de a lungul duratei lor de viață. **utilizați numai produse sterile. Acestea sunt marcate cu simbolul de sterilizare. Nu folosiți produsele dacă ambalajul este deteriorat. Folosiți produsele în termenul de valabilitate de pe acest ambalaj. Folosiți numai produse care se potrivesc perfect. Folosiți numai produse care se potrivesc perfect.

UTILIZAREA

Produsele sterile livrate se folosesc numai de către personane instruite și competente sau sub supravegherea personelor instruite și competente. Cu acele instrucțiuni nu vă treg informa cum trebuie ca trebuie sau de orice altă activitate asociată, cu excepția instrucțiunilor (cu excepția instrucțiunilor de utilizare, de spălare sau orice altă activitate asociată, acestor instrucțiuni trebuie să fie inclusă trebuie ca utilizatorul de la finalul pagina de a utilizat echipamentul, printr-o instruire adecvată. Dezasamblarea prin orice altă activitate pentru care produsul folosit acest produs nu este scopul pentru care produsul este destinat. Alegerea, utilizarea sau folosirea greșită a produsului, inclusiv produsele care, chiar și parțial, au fost folosite, poate fi periculoasă și poate avea efecte negative asupra sănătății și siguranței pacientului. Folosirea produselor care au fost folosite sau reprocesate poate duce la o funcționare defectă a produsului care poate fi periculoasă

ENGLISH

GENERAL INFORMATION

These instructions inform you about the correct use throughout the life of the product. **read, understand and keep these instructions.** If not, you can download the instructions from the web site **www.camp.it**. The EU declaration of conformity can be requested from the manufacturer. Translate the instructions into the language of the country where the product is to be used.

USE

This equipment should be used only by trained and competent persons. Otherwise the user should be under the direct supervision of a trained and competent person. This notice will not teach you the techniques for work at height or any other associated activity; this notice will not teach you the techniques for climbing, alpinism or any other associated activity; you must have received qualified training in these or other related activities. Use this equipment for no other purpose than climbing, alpinism or work at height. Any other use is dangerous. The consequences of incorrect selection, misuse or poor maintenance of equipment could result in damage, serious injury or death. The user must be medically fit and capable to control his own security and any possible emergency situations. For equipment used for work at height, the user must be able to rescue himself or be able to be rescued by other people in complete safety. If the equipment is used for work at height, it is essential that the user plans the work in such a way that no vertical free fall is possible and that the free space required between the user and the ground, or other obstacles, is adequate. If the user is at a potential fall distance equal to the free space required between the user and the ground, or other obstacles, in the event of a fall, there will be no collision with the ground or the other obstacles in the fall path. A full body harness is the only acceptable body holding device that can be used in a fall arrest system. The product should only be used as instructed and no alterations should be made to it. It may be used only with those accessories which are compatible and suitable for the purpose for which they are intended. Do not exceed the capacity or specifications of each individual piece of equipment. This leaflet shows examples of incorrect utilization of this product. Note that it is impossible to show or imagine all improper utilizations and that this product should be used only in the way specified by the manufacturer. Do not use if doubts exist. If possible the product should be inspected yearly.

MAINTENANCE

Cleaning of the textile and plastic parts: rinse in clean water and neutral soap (max temperature 30°C) and dry naturally away from heat and direct sunlight. Lubricate the moving parts with silicone or Teflon based lubricant. Do not use petrol or solvents. These do not to affect the performance of the product. Chemicals: withdraw the product from service if it comes into contact with chemical reagents, solvents or fuels which could affect the performance of the product.

STORAGE

Store unpacked in a cool, dry, dark place away from heat sources, high humidity, sharp edges, corrosive or other possible causes of damage.

RESPONSIBILITY

The company C.A.M.P. spa, or the distributor, will not accept any responsibility for damage, injury or death resulting from misuse of or from modifications to a CAMP branded product. It is the user's responsibility at all times to ensure that he/she understands the correct use of the product, that the product is suitable for the work to be done, that the product is used only for work it is designed and that he/she practices all proper safety procedures. Before using the equipment, take all necessary steps to familiarise yourself with rescue techniques should an emergency occur. You personally assume all the risks and responsibilities for your actions when using this product. If you are not able or not in a position to assume these, do not use the equipment.

5 YEAR WARRANTY

This product is warranted against any faults in materials or manufacture for 5 years from the purchase date. Limitations of warranty include: normal wear and tear, modifications or alterations, incorrect storage, corrosion, damage due to accidents or negligence, use for which this product is not specifically designed.

SPECIFIC INFORMATION

This product is intended for use in a fall arrest system to protect against the risk of falls from a height.
- Use in a fall arrest system with a full body harness, connectors, anchorage points and other compatible similar techniques;
- when it is rated EN 362, to be used as a component of an anchorage system for work positioning;

USE

This product should only be used as instructed (**chart A and B**) and according to the **fig 1 to 13**. Warning: certain situations may reduce the strength of the connector (**fig.2**).

Use of Karabiny by the C.A.M.P. (**fig.3-5**) is highly recommended in order to keep the rope or webbing in position on the lower part, so avoiding the risk of rotation and cross loading.

Any external gap equal to or larger than 2mm (**fig.6**) is a dangerous (**fig.7**).

Carabiner EN 362: the length of the connector should be taken into account when used in any fall arrest system, as it will influence the dynamic load. Connectors with screw gates should be used with the gate fully closed and locked. Connectors with screw gates and with a locking device, and the work carried out in such way as to minimize both the potential for falls and the potential fall distance. Verify the free space required between the user and the workplace before each occasion of use, so that, in the case of a fall, there will be no collision with the ground or the other obstacle in the fall path. A full body harness is the only acceptable body holding device that can be used in a fall arrest system. The product should only be used as instructed and no alterations should be made to it. It may be used only with those accessories which are compatible and suitable for the purpose for which they are intended. Do not exceed the capacity or specifications of each individual piece of equipment. This leaflet shows examples of improper
