

**easyTEMP temperature sensor  
for Compact GSM II module**

**Installation guide**

Document version:1.0 06.09.2012

**Wiring:**

- White: +9-30V DC
- Brown: 0V (GND)
- Green: Signal wire – output (connect to input IN1 of the Compact GSM II module)

Fasten the sensor and the cable properly to avoid damages of the unit.

**Technical specification:**

- Temperature measuring range: -30°C...+70°C
- Operating temperature: -30°C...+70°C
- Measuring accuracy: +/-1°C
- Supply voltage: 9-30V DC
- Current consumption: <1mA @ 12V DC
- Cable length: 1m
- Dimensions: 61 x 12mm + strain relief
- Output signal: serial data communication

**Wiring diagram:**
