Distel Limited Edition Alu 3 Pink

Distel-Alu 3 Pink, Pads Plus, Classic-Straps

Short Description:

Distel is donating 5% of sales to Brustkrebs Deutschland e.V.

To join the fight against breast cancer, visit the fundraiser and donate: [Distel Pink October 2024](#)

Distel pinked up your favorite spurs, letting you enjoy the coolest design out there - all while helping a good cause.

Made in Germany

Description:

The third evolution of Distel aluminum climbers are the lightest aluminium spurs currently available. They combine lightness and comfort for an outstanding climbing experience and allow you to reach new heights.

- Newly designed hot forged shank with optimized cross section and stronger alloy
- Anti-slip ribs on the bottom of the stirrup and 3-dimensional forging details
- Blasted surface for highest possible bending fatigue strength together with a scratch-resistant black polymer anodization results in a satin matt finish

Pads Plus

The Distel Alu 3 comes with a premium pad:

- Additional padding for the shin and calf is provided with a foam plate that is 50% larger than before. The Pads Plus encloses almost the entire leg.
- An optimal fit in the shell and ultimately on the user's leg is achieved by a grid structure of the pad.
- The grid structure leads to a punctual pressure distribution, which gives the user an increased subjective feeling of comfort.
- Increased thickness of the foam with 20 mm

Gaffs with black PTFE coating

PTFE is widely known as a highly engineered plastic that dramatically reduces friction and breakaway moments, such as in aluminum pans:

- Easier release of the gaff from the wood saves effort and stress

Lower Classic straps with upper VELCRO® Brand straps:

The high-quality VELCRO® Brand upper 105 mm straps provide a tight, no-play fit with optimal pressure distribution and comfort.

The lower imitation leather straps are called Classic straps for a reason. Made of highly durable, waterproof, and strong U.S.-made BioThane® material. This strap is highly resistant to resin and sawdust and will stand up to the rigors of daily arborist work.

Product Specification:

- Country of origin: Germany
- Unit: pair
- Weight net per pair: with short/pole gaffs: 2.14 kg; with long/tree gaffs: 2.18 kg; with medium gaffs: 2.16 kg
- Gaffs: Medium Gaffs
- Straps: Lower classic straps and upper Velcro® straps
- Operating temperature: -20 °C to 50 °C
- Weight limit with equipment: 150 kg
- Height adjustability: 34.3 cm to 47.8 cm in steps of 0.6 cm
- Adjustment of upper straps: 31 cm to 50 cm
