

## **Big-Boss**

The REECOIL Big-Boss chainsaw lanyard has been designed to give you full mobility while using heavy rear handle saws.

When extended the Big-Boss lanyard stretches further than other lanyards. It is designed for making those awkward cuts other lanyards don't let you reach. Saving you time and effort in having to spur round the stem or removing your lanyard and risking tool drop.

The extra size of the Big-Boss gives you the extra strength and security when running big saws. We have maintained the compact size of the Big-Boss when stored, while still giving you the full reach, when in use (40cm extending to 170cm).

The hang carabiner/ring has been positioned to sit as close to the saw as possible, giving you the highest saw hang position on your harness.

Connect to rear handle saws in two ways:

- Attach to the rear handle of your saw with a girth hitch and use the extra sewn loop to bring the hang carabiner as close to your saw as possible. This makes your saw sit high on the back of your harness.
- You can also attach to the wrap handle, giving your saw a horizontal hang position and keeping the bar away from your leg.

### **Specifications:**

MBS: 7,5 kN (750kg)

WLL: 1.07kN (107kg)

Safety Factor: 7:1

Retracted Length: 40 cm

Extended Length: 170 cm
