## FALCON

FALCON is a lightweight seat harness with a metal ventral attachment point that distributes the load between the waistbelt and the leg loops during suspended rescue. It features a waistbelt and leg loops that are semi-rigid for comfort and equipped with self-locking DOUBLEBACK buckles for quick and easy adjustment. The rear buckle allows a TOP or TOP CROLL chest harness to be attached.

Metal ventral attachment point distributes the load between the waistbelt and leg loops during suspension.

Semi-rigid, slim waistbelt and leg loops ensure optimal comfort/weight ratio.

The textile side attachment points are designed for occasional use and limit bulk and weight.

Leg loops are equipped with self-locking DOUBLEBACK buckles for quick and easy adjustment. Foam on leg loops can be adjusted for perfect positioning.

---

**Short Description** Lightweight seat harness for suspended rescue

---

**Selling Points**

- Metal ventral attachment point distributes the load between the waistbelt and the leg loops during suspension
- Comfortable, ultra-light design:
  - semi-rigid, slim waistbelt and leg loops ensure optimal comfort/weight ratio
  - textile side attachment points, for occasional use, limit bulk and weight
- Ergonomics:
  - waistbelt and leg loops equipped with self-locking DOUBLEBACK buckles for quick and easy adjustment
  - foam on leg loops can be adjusted for perfect positioning
  - rear buckle allows a TOP or TOP CROLL chest harness to be attached
  - four equipment loops: two large rigid ones in front for easy access to gear and two small flexible ones in back that will not interfere with wearing a backpack
