Category	Connectors
Subcategory	Special lightweight carabiners

FREINO Z

The FREINO Z carabiner has a friction spur for adding or adjusting friction during the descent. It is easy to use and compatible with I'D S, I'D L, I'D EVAC and RIG self-braking descenders. When rotated, it makes the descender loss-proof when transferred from the equipment loop to the ventral attachment point or anchor. The FREINO Z has the TRIACT-LOCK automatic locking system.

When rotated, it makes the I'D S, I'D L and I'D EVAC or RIG self-braking descender loss-proof when transferred from the equipment loop to the ventral attachment point or anchor.

The spur helps increase friction for improved descent control with a heavy load (e.g. two-person rescue situation).

Short Description Carabiner with friction spur for descenders

Selling Points

- Descent control:
 - the spur helps increase friction for improved descent control with a heavy load (e.g. two-person rescue situation)
 - easy to use and control. The rope can be quickly redirected over the friction spur and removed with one hand
- Easy handling:
 - rope is easily inserted into the spur, without opening the carabiner
 - Keylock system, to avoid any involuntary snagging of the carabiner
 - TRIACT-LOCK automatic locking system with triple-action gate opening
 - for use on a harness or an anchor
- When rotated, it makes the I'D S, I'D L and I'D EVAC (1) or RIG (2) self-braking descender loss-proof when transferred from the equipment loop to the ventral attachment point or anchor

(1) Versions starting in 2019

(2) Versions starting in 2018

Specification

- Material(s): aluminum
 - Certification(s): CE EN 362, EAC, NFPA 1983 Technical Use
 - Gate opening for friction spur: 12 mm
-

Specifications by reference

Reference(s)	M042BA00
Weight	75 g
Locking system	TRIACT-LOCK
Major axis strength	23 kN
Minor axis strength	8 kN
Open gate strength	8 kN
Gate opening	18 mm
Made in	GB
Guarantee	3 years
Inner Pack Count	1
Quantity Per Box	25
EAN	3342540829633
