

Description

The REECOIL Full-Reach chainsaw lanyard has been designed to give you full mobility while climbing and cutting.

When extended the Full-Reach lanyard stretches further than other lanyards but still Recoils as short, if not shorter than others. This means that your movement isn't restricted while making cuts and handling your saw.

It has also been designed to give you two ways of attaching to your top-handled saw.

- Attach to the rear D-Ring on the back of your saw with a girth hitch and use the extra sewn loop to bring the hang carabiner as close to your saw as possible. This makes your saw sit high on the back of your harness.
- You can also attach to the top handle using the built in second loop, making it very easy to hang your saw up one handed onto your Petzl Caritool, Rock Exotica Transporter or similar tool hook.

Designed to work with the Stihl MS200T, MS201T, MS192T, Husqvarna T540XP and other climbing saws.

Additional Information

<u>MBS</u>	<u>4.5kN</u>
<u>MAX TOOL WEIGHT</u>	<u>5.33kg (Fall Factor 1.5)</u>
