

ORBITER H

REF.NO. 2P667

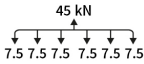

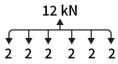

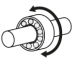

Triple pulley with mobile side plates, very versatile and robust.

Main features

- it allow the insertion of two connectors in the upper eyelet and it is mounted on ball bearings;
- the light-alloy flanges extend beyond the pulley wheels to minimise rope wear;
- ideal for constructing rescue winches with 6x reduction factor or in multiple pulley systems where a larger lifting force is required;
- additional attachment point suitable for a single connector.
