

SPIDER BOX

A BAG DEVELOPED FOR THE TRANSPORT AND STORAGE OF LIGHTER ROPES (ACCESS, CLIMBING).

TECHNICAL DATA

- 1680D PVC-coated polyester fabric (Reach).
- Flexible protection with drawstring and tanka.
- Large opening.
- Weight: 380 g (13.4oz - 20L), 480 g (17oz - 35L).
- Colours: blue (20L), grey (35L).

PERFORMANCES

A very practical and sturdy rope bag, with a large opening to easily access its content. Stowing ropes in the bag is quick. As for the protection, it is large and flexible, so it folds over easily and doesn't get in the way when you are stowing the ropes. It has 2 ventilation panels and 2 long handles, and also a large see-through pocket (to display the climber's name, for instance).
