

BLUE MIX (100g+100g)
ITEM #: F-117

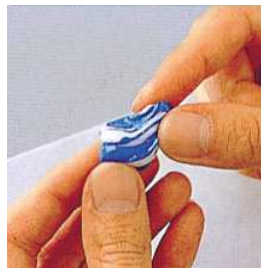

1) Prepare an original piece or object that you want to make a mold of. If you are making a mold of an Art Clay piece, please make sure that the piece is dry.

2) Take out same amount of white putty and blue putty, depending on the size of the piece you want to mould.

3) Mix them together well by kneading.

4) While the mixture is in a soft state, press the mixture onto the molding piece. This will harden after leaving for about 30 minutes, then carefully remove.

5) Fill the mold with Art Clay Silver clay type, and take it out from the mold after drying first with hot air from a dryer (20 to 30 min.)

6) Use epoxy glue if you would like to attach your piece to a metal, porcelain or glass surface.
