

VLFL922000 Instruction Manual

1

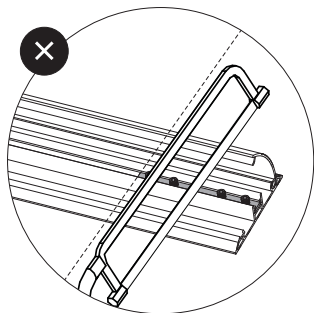

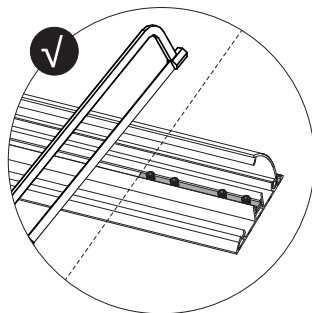

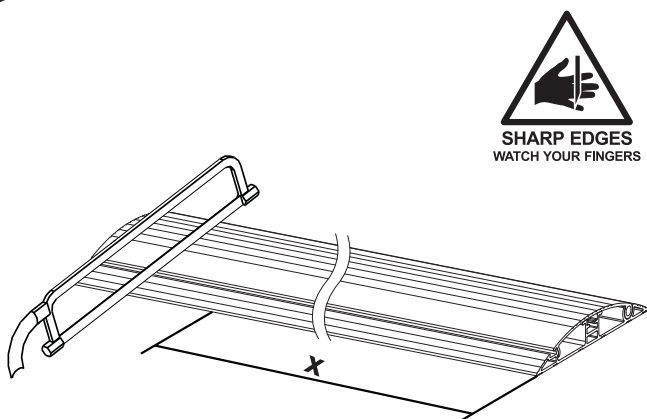

Remove the plastic end caps on each side of the ducting.

2

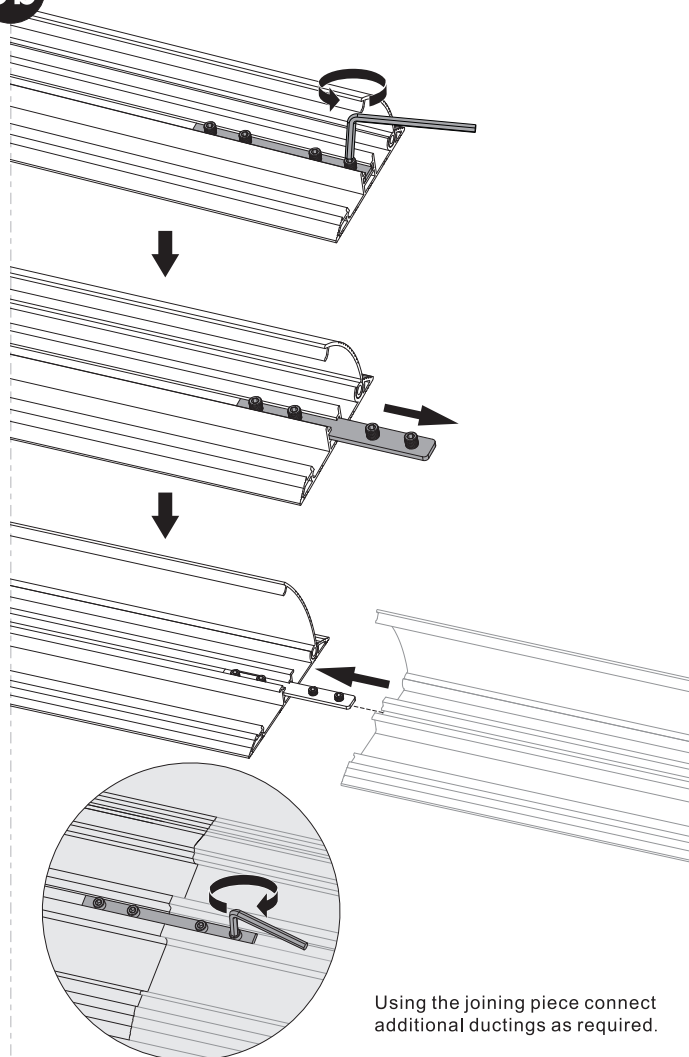

Using a flat tipped screwdriver gently pry open the cover as shown.

3a

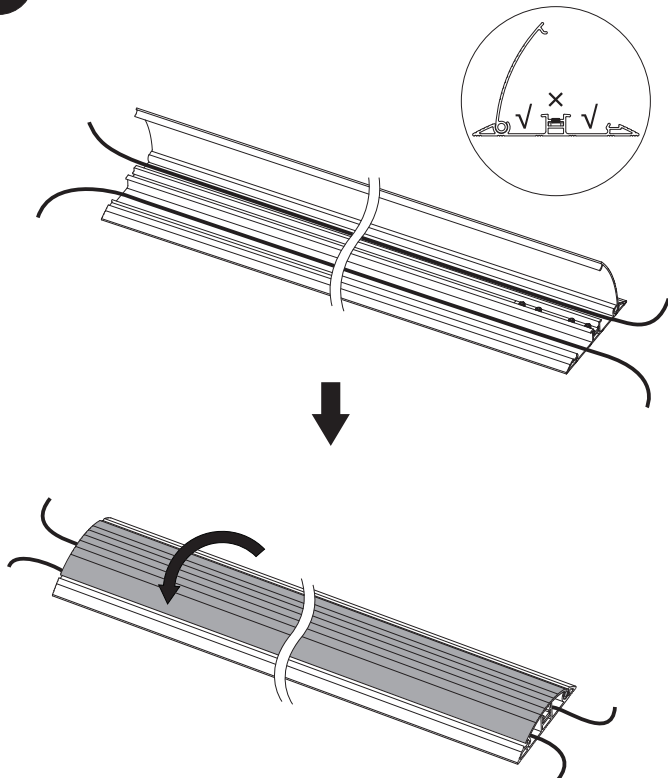

Using a hacksaw cut the ducting to desired length (Keep the Lid Closed).
NOTE: Avoid cutting the joining piece.

3b

Using the joining piece connect additional ductings as required.

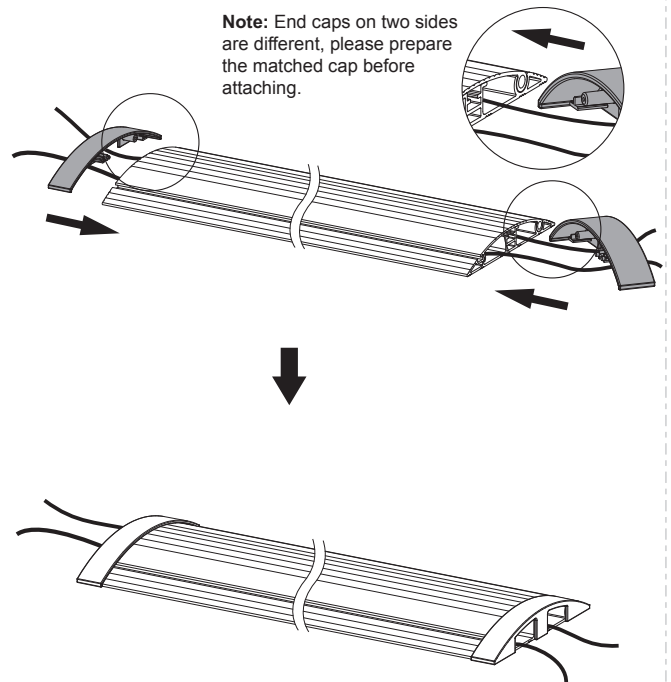

4

Insert the wires.

NOTE: Route wires within the grooved channels inside the ducting.

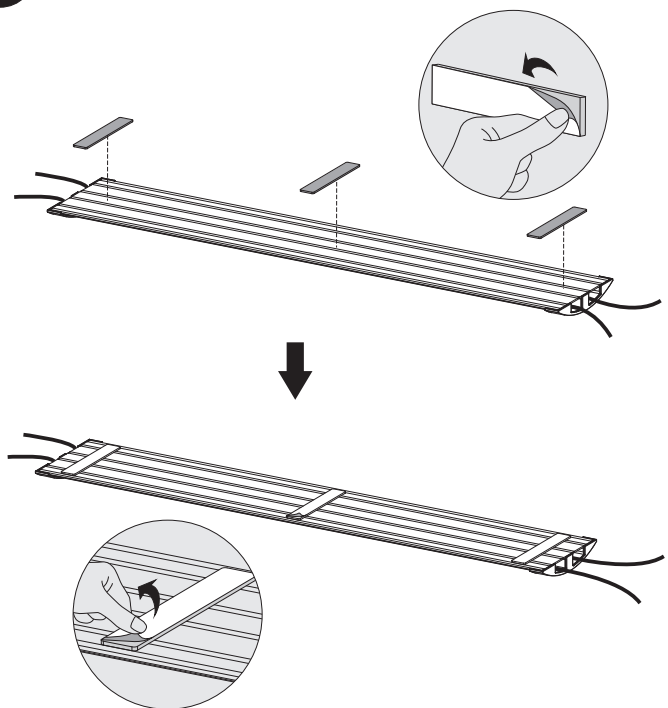

5

Note: End caps on two sides are different, please prepare the matched cap before attaching.

Re-attach the plastic end caps on each side of the ducting.

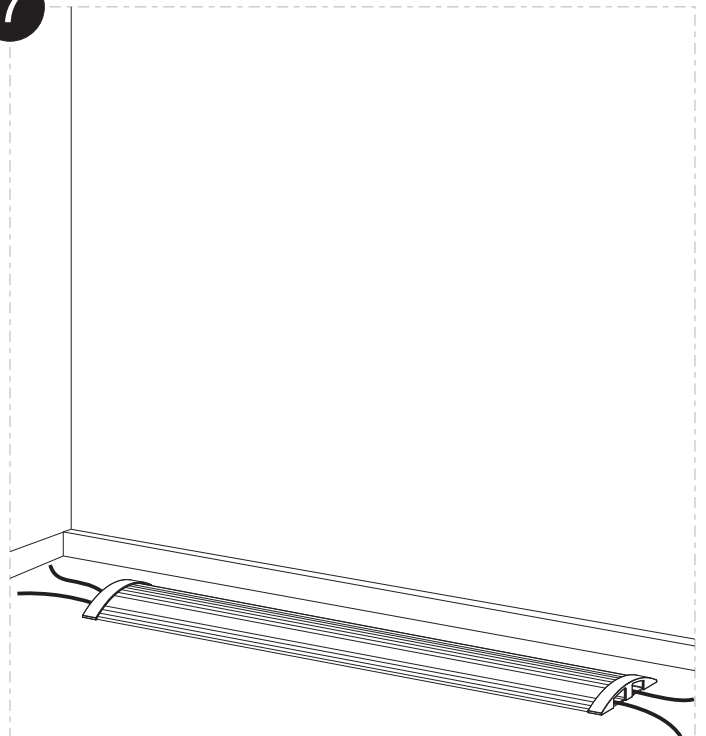

6

To prevent the ducting from moving, attach double-sided tape as required.

NOTE: Double-sided tape is recommended when using the ducting on hard floors.

7

Position your ducting in the desired location.
