

## ROOMPANEL PLUS

Enhance Your Scheduling Experience

10.1-Inch Multi-Point  
Interactive Panel

Auto  
Wake-up

High Visibility  
LED Bars

Actions with  
Occupancy Sensor

Discover the power of the Yealink RoomPanel Plus, a 10.1-inch multifunctional meeting room schedule panel powered by Android 11. With its full RGB programmable LED background illumination, you can instantly view the room's status at a glance. Equipped with multi-point touch capability, built-in NFC/RFID reader, and enhanced microphone arrays and speakers, this innovative panel meets the diverse needs of today's dynamic office environment.

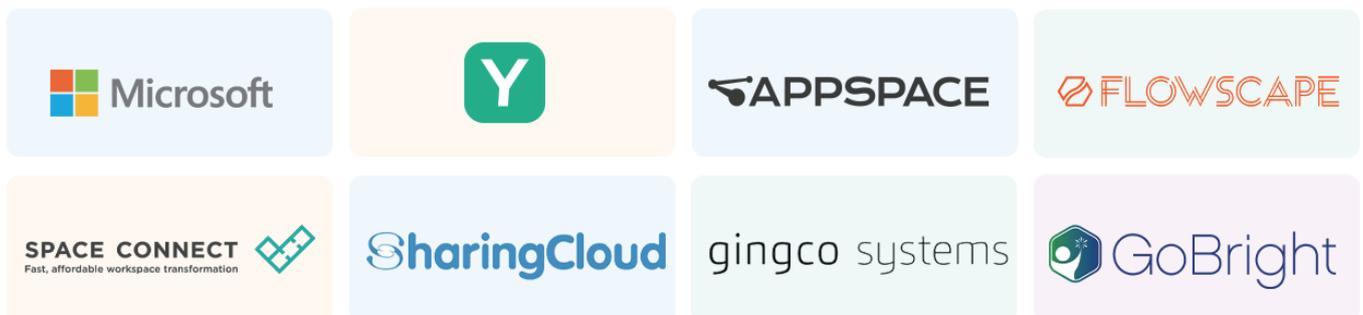

# Meet the New RoomPanel Plus

Designed for a better scheduling experience, the 10.1-inch spacious multi-touch screen of RoomPanel Plus makes it easy to see meeting details clearly and reserve a room for ad hoc or future meetings. The built-in Android 11 system gives you an even faster, more reliable, and more secure user experience. In addition, with its sleek and lightweight design, the RoomPanel Plus effortlessly complements diverse spaces.

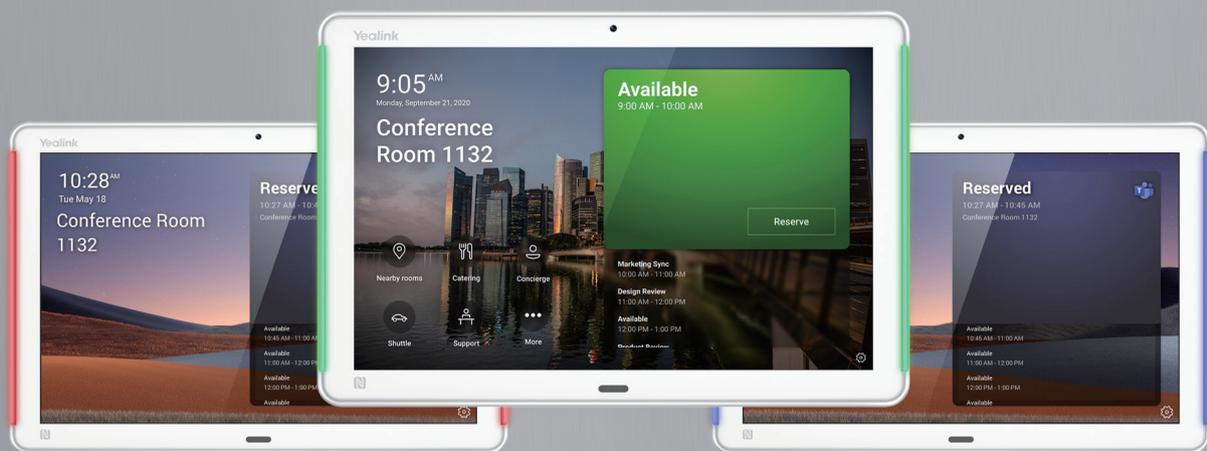

## Choose the UC Provider You Like

RoomPanel Plus is compatible with most third-party scheduling UC providers and will continue to expand its compatibility with more providers in the future. When you start the device, you have the flexibility to select the UC provider of your choice and enjoy a native scheduling experience right away.

# View Room Status At-A-Glance

With the new stylish design and full-color LED light, you can see the availability of the meeting room at a distance. Your team and guests can quickly locate their target rooms, making meeting scheduling easy and simple. Paired with a Yealink RoomSensor, the RoomPanel Plus can also update room status automatically, providing you with a smarter and more user-friendly meeting experience.
