# Welcome to the world of aveva design!

With passion for new ideas, inspirational design and natural materials, we love to create colorful functional objects. Focusing on sustainable ideas and materials, we create modern and playful items. Aveva originally refers to the designer & founder behind the company; Eva. All design starts with a person, and aveva simply means design "byeva" in swedish. Today aveva refers to a swedish design company, also collaborating with other designers, both locally and internationally.

We like to challenge traditional and natural materials and stretch their possibilities by combining the hard and soft materials in interior design. Aveva has retaken the hand felted wool into the living area, keeping an old tradition alive and the values that it suggests. The fact that wool is durable, insulating and resistant gives us endless possibilities to use wool in our products. The combination and contrasts of wood and wool is a clear part of our trademark, but the core value is that we are drawn to natural materials, joy for your eyes and products for the heart.

We hope to inspire you!

#### Livingroom in wool and wood

A modern and smart coffee table! The spray coated table top can quickly be turned and used on both sides, each side in a different color. Works perfect alone but excellent together where the tables different diameters and heights comes to its best expression. With extra tabletops you may let this table change with your mood and color preferences over the years.

#### Raw collection

Raw to its shape, raw as a diamond, raw as the base element of carbon (coal) with raw lasercut edges.

The material behind the raw collection is an evolution of MDF (Medium Density Fibreboard) being moisture resistant yet natural and raw to its finish. Valchromat is an innovative product combining natural features of wood, colors and exploring the third dimension through the beauty of texture in the material.

Wow shelf

wow **shelf** p.27 / wood **grinder** p.35

# We care!

Therefore we choose our materials consciously and carefully to ensure sustainability for the environment and manufacturers, partners and employees. We produce as much as we can in Scandinavia, but we also work with handcrafted production in other parts of the world where the traditions stayed alive. We choose manufacturers, partners and employees carefully to ensure that everybody involved care as much as we do. We strive for honest and long lasting relationships.

# We choose!

mule-free wool azo-free colors certified wood fsc certified paper organic cotton

# We love wool!

wool is...
100% natural , renewable and biodegradable
it is warm but it is cool
flame retardant and will self-extinguish
strong and long lasting
the world ´ s oldest renewable fibre and the most versatile and modern
smarter than any other fibre
a natural insulator
live naturally, choose wool
