

## "VIBROFIGHTER" UNIVERSAL INJECTOR VIBRATION TOOL

### UNIVERSAL

#### Components

- Supplementary set to remove injectors.
- The tool acts directly through vibrations and impulses on the extraction tie rod installed on the injector.
- It has been designed to fully remove the injector from its seat without damaging the cylinder head and without breaking the injector, which would leave residues inside the head.
- Usable on almost all the injectors on the market (with and without hammer).
- Equipped with a small regulation valve with adjustable vibration intensity system accordingly to the type of work to do.
