Belt-driven rotary screw compressors 2.2-75 kW

Shamal screw compressors: designed for industry and for energy saving

Our compressors are the answer to the needs of largescale industry and small and mid-sized companies, where compressed air is one of the main sources of energy.

They are designed for continuous duty in very hard operating conditions, with special attention to energy consumption, low operating and maintenance costs, simple installation and easy use.

The entire production process, from design to packaging, is carried out at our facilities in Italy. Our highly skilled staff is dedicated to support the manufacturing and assembling activities.

The continuous control and monitoring of each process grants the utmost precision at every step, in order to achieve the highest quality, supreme product reliability and flexibility of use.

1 INNOVATIVE COOLING SYSTEM

The cooling system is among the most innovative in the field. A thermostatic controlled centrifugal fan keeps the temperature of the entire compressor to specific tolerance and at a constant level, avoiding temperature peaks that can be harmful for the correct operation of the compressor. The action of the fan, combined with the efficiency of the oversized oil cooler, guarantees the operation of the compressor in different climatic conditions. The "no-noise" fans, the specially studied labyrinth ventilation and the use of high quality sound-proof materials provide the sound level to be among the lowest in the range.

2 EFFICIENT TRANSMISSION

The POLY-V belt drive ensures significantly lower power losses and three times longer the service life compared to standard range "V" type belts fitted to other compressors on the market. Belt tensioning is carried out through a sliding belt tensioner.

3 SPIN-ON FILTERS

The oil filter and separator filter, both spin-on type, ensure maximum efficiency and simple maintenance.

Construction features and strength points

High energy saving

The choice of high quality components, combined with our high performance AIR-ENDS and Premium Efficiency

IE3 motors, ensure reduced power consumption, substantial energy savings and exceptional efficiency performance. Furthermore, the IE3 motors reduce CO₂ emissions: an important contribution to protecting the environment.

2 Years warranty

Our air-ends, inverters and controllers are covered by 2 Years warranty.

High productivity

High air output performances is one of the key features of the SHAMAL project engeneering.

High reliability

Quality control and components from primary global manufacturers guarantee long operating life and long maintenance intervals.

High performance air-ends

Our high performance AIR-ENDS are entirely designed, produced and tested in our Italian facilities: the special design of the screw profile assures high performances.

Low noise

GHIBLI and STORM compressors are very quiet: the use of very efficient soundproof materials makes them suitable for installation in any working place.

Advanced electronic controllers

ETMII

Installed on models from 4 to 15 kW.

Controller with multi-function backlight display, the menu is alphanumeric type. In the main screen are displayed:

- Working pressure (offload/load);
- Oil temperature;
- Total working hours;
- On-load working hours;
- Compressor status led (stand-by, offload, load);
- Hours remaining before maintenance.

- Four maintenance timers (air cartridge, oil, oil filter, oil separator).
- Automatic re-start after power failure.
- Cooling fan temperature settable.
- Compressor remote start settable.
- Integrated sequence phase relay.

ETIV

Installed on models from 18.5 to 75 kW, and STORM 11 VS.

Controller with multi-function backlight LCD graphic display, the menu is drop down type. In the main screen are displayed:

- Working pressure (offload/load);
- Oil temperature;
- Compressor status (stand-by, offload, load);
- Fan status (off/on);
- Date and time;
- Hours remaining before maintenance;
- Inverter use percentage.

Remote monitoring (on demand)

GSM/GPRS/Ethernet/WiFi module (for on-line compressor status, remote assistance, connection with PC, Smartphone and Tablet, connection between neighbour compressors).

Master/slave function

It is possible to connect up to 4 compressors for managing distribution of the workload in such a way to equalize the hours dynamically changing set pressures of the various compressors.

- NEW anti-rotation system
- Extremely silent
- Minimum energy consumption
- Very compact design
- Low maintenance costs
- Ease of installation and use
- Plug and play

- Poly-V belt transmission that guarantees long life and minimum maintenance.
- Operating pressure: 8, 10, 13 bar.
- Independent ventilation from the main electric motor.
- Easy discharge of condensation.
- The internal mechanical parts are easy to access, to perform routine maintenance quickly and simply.
- Available with dryer module to provide clean, dry air that improves the system's reliability, avoids costly downtime and production delays, and safeguards the quality of the final product.

The GHIBLI range is available in 2 versions:

- GHIBLI SE 2.2-4 kW: electromechanical ON/OFF switch, with motor protection. The pressure gauge and hour counter are included in the control panel. Easy to use, no idle running means considerable energy saving.
- GHIBLI 4-5.5 kW: star-delta starter, including the ETMII electronic controller, that controls the complete operation of the machine.

M = Single-phase

Free air delivery as per ISO 1217 Annex C, at 7.5 - 9.5 - 12.5 bar at the compressor outlet. ± 3 dB (A) as PNEUROP/CAGI PN-NTC 2.3.

shamal

STORM 8 - 11 - 15 - 16

- Extremely silent
- Very compact design
- High efficiency.
- Minimum energy consumption
- Low R.P.M.
- Ease of installation and use
- Plug and play

- Poly-V belt transmission that guarantees long life and minimum maintenance.
- Operating pressure: 8, 10 and 13 bar.
- Independent ventilation from the main electric motor.
- Easy discharge of condensation.
- The internal mechanical parts are easy to access, to perform routine maintenance quickly and simply.
- Easy transportability: the machine is particularly easy to lift with a fork truck or hand truck thanks to a steel bar secured between the feet at the base of the air receiver (both at the front and to the side).

- Available with dryer to provide clean, dry air that improves the system's reliability, avoids costly downtime and production delays, and safeguards the quality of the final product.

Available in 3 versions:

- floor mounted,
- with tank (270 or 500 liters),
- with tank and dryer.

ALL MODELS WITH TANK ARE ALSO AVAILABLE ON REQUEST WITH A WORKING PRESSURE OF 13 BAR, PROVIDING THE SAME PERFORMANCE OF MODELS ON GROUND.
 Free air delivery as per ISO 1217 Annex C, at 7.5 - 9.5 - 12.5 bar at the compressor outlet. ± 3 dB (A) as PNEUROP/CAGI PN-NTC 2.3.

shamal

STORM 18.5 - 22

- Extremely silent
- High performance screw air-ends
- Low maintenance costs
- Minimum energy consumption
- Ease of installation and use
- Prefiltering panel
- Ease of access for routine maintenance operations.

- Designed and manufactured so that they function as an integral whole with the maximum efficiency.
- All most important components of the compressor are machined in house with highly innovative process controlled machines: this allows full control on the production cycle and over the total quality of the complete compressor.
- The cooling air flow, channeled by the thermostatic controlled centrifugal fan, cools down an oversized combined oil/air heat exchanger: this permits the compressor to run in severe temperature conditions.

- Poly-V belt transmission that guarantees long life and minimum maintenance.
- Operating pressure: 8, 10 and 13 bar.
- Independent ventilation from the main electric motor.
- STORM 18.5 and 22 with dryer module (ES) provide clean, dry air that improves the system's reliability, avoids costly downtime and production delays, and safeguards the quality of the final product.
- STORM 22 available with variable speed (VS models).

Free air delivery as per ISO 1217 Annex C, at 7.5 - 9.5 - 12.5 bar at the compressor outlet. ± 3 dB (A) as PNEUROP/CAGI PN-NTC 2.3.

Intake regulator

Minimum pressure valve

- The normally closed electropneumatic system adjusts the compressor operation, guaranteeing the minimum pressure necessary during idle running and maximum energy saving at start-up, streamlining the energy cost/air generated ratio.
- The minimum pressure valve, built with oxide free material, is fully machined. An ideal technical solution to provide maximum reliability in any operating conditions.

shamal

STORM 31 - 38 - 45 - 55 - 56 - 75

- Extremely silent
- High performance screw air-ends
- Low maintenance costs
- Ease of installation and use
- Prefiltering panel
- Minimum energy consumption

- Poly-V belt transmission that guarantees long life and minimum maintenance.
- Operating pressure: 7.5, 8, 10 and 13 bar.
- Independent ventilation from the main electric motor.
- The wide front and rear panels grants ease of access, reducing inspection and maintenance time.
- 55 and 75 kW versions are equipped with double separator filter: long service intervals and high quality compressed air.

- STORM 31 and 38 with dryer module (ES) provide clean, dry air that improves the system's reliability, avoids costly downtime and production delays, and safeguards the quality of the final product.
- STORM 38, 56 and 75 available with variable speed (VS models).

Variable Speed

- Energy saving
- Silent operation
- Compact design
- Low maintenance
- Versions with dryer
- High efficiency inverter

Nowadays, the reduction of the energy consumption has become a global challenge in terms of environmental impact. Reducing power consumption and protecting our valuable energy resources represents one of the greatest global environmental challenges of our times.

The STORM compressors, with power at 11, 22, 37, 55 and 75 kW, are also available in variable speed drive version, providing high performance combined with energy saving solutions.

The application of a frequency inverter, able to dynamically adjust the voltage/frequency/current values of the motor, allows the elimination of unnecessary power losses by constantly adjusting the generation of compressed air to match the real air demand, offering many proven advantages to the user:

- Continuous regulation of the motor speed and compressed air generation to precisely match the air demand.
- The air output is constantly adjusted between 40% and 100% of the compressor full capacity.
- Constant and accurate air pressure control selectable at any value between 6 and 10 bar.
- Energy consumption is proportional to the delivered compressed air.

**INTEGRATED DRYER AND FILTERS**

The STORM 11 ES VS features a fully integrated and complete air treatment module including a generously sized refrigerated air dryer and both inlet and outlet high efficiency filtration.

■ **FSN original spare parts** have been rigorously selected, checked and tested by specialized technicians to ensure the utmost efficiency and endurance of the compressor. The parts are stocked in our "LOGIMAT" centralized and automated warehouse in Zola Predosa (BO) - Italy, where 12,000 part codes on 10,000 sqm are managed every day.

■ Specialized staff is continuously in contact with our distribution centres worldwide, to deliver spare parts to our customers in the shortest possible time.

■ Our "Hot-Line" service is able to prepare and ship within the same day urgent orders.

■ The use of **FSN Long Life Kit**, specifically studied for screw compressors, extends maintenance intervals, cutting down service costs and ensuring consistent product performance, with consequential energy saving.

ROTERGY SYNTHETIC LUBRICANTS

FSN lubricants are specially designed for rotary screw compressors to achieve rapid water separation, lower friction, enhanced energy savings, longer maintenance intervals and excellent bearing lubrication while offering superior rust and corrosion protection. RotEnergyFood is a high quality food-grade rotary compressor lubricant specifically designed for use in the food and beverage industries to meet their production quality standards.
