

EASI-WAX

CARNAUBA POLISH

Easi-Wax is a high grade machine or hand polish that delivers a long lasting deep gloss shine to any type of paintwork.

Natural: Easi-Wax is made from only the purest Brazilian Carnauba Wax (cera de ortho) and contains no aromatic solvents.

Added Durability: The Easi-Wax formula has been developed and tested to ensure the wax film seals paintwork and lasts up to 50% longer than conventional waxes.

Versatile: Can be used on cars, motorbikes, boats, coaches, caravans etc

Easy to use: The Easi-Wax formulation has been designed to be applied by machine or by hand. The very low chalk residues are quick to buff up to a luxurious high gloss finish.

Ideal Finishing Wax: Easi-Wax compliments our new Easi-Cut compound and can be used as a wax sealer in the final finishing stage of a paint rectification process.

Bodyshop Approved: Contains no volatile silicones. NOTE Only suitable for manual/hand use within a paintshop environment, as machine use can create airborne spatter, inadvertently contaminating adjacent paintwork.

Directions

Machine Use: Set machine speed to 800-1500rpm (free running) and use P40 Black Soft Finishing Foam Mop.

For vertical surfaces: charge the black soft foam pad with Easi-Wax.

For horizontal surfaces: Easi-wax can be applied to the black foam pad and/or directly onto the panel.

1. Apply wax to paint surface and spread to a thin even layer, using the polishing pad.
2. Using machine, polish up paint surface reducing the pressure as the film starts to clear.
3. Continue to float the surface with un-pressured pad and when clear finally remove any trace residues using micro-fibre polishing cloth.

Hand Use:

Use 100% fine cotton cloth to avoid introducing any scratches to sensitive paint finishes. Shake container before use. Apply to paint surface, allow polish to haze dry for a minute, then buff to a high gloss finish using non-scratch micro-fibre polishing cloth.

Typical Specification:

Composition	: An emulsified blend of Carnauba Palm Wax, non-volatile silicones, polishing aids, solvents in a water base with perfume and dye.
Appearance	: Golden yellow cream
pH	: 8.50
Viscosity	: Mobile cream
Perfume	: Classic Wax
Stability	: Protect from freezing. Store at ambient temperature.
Shelf Life	: 2 Years minimum in unopened containers.
Packaging	: 900ml tottle, 5L
