

EXIT

Biological Odour Destroyer

Professional Problem Solving

Solution: a powerful biological action to completely destroy a wide variety of bad and musty smells including: vomit, cat spray, dog smells, spilt milk, urine, tobacco odours, cooking smells etc. etc. etc.

All vehicle Interiors: Exit: is the ideal professional answer for cars, taxis, coaches, buses, trains, aircraft, Boats, ships, leisure industry buildings eg. cinemas etc. where malodours within confined spaces can be a major problem and very difficult to remove.

Refreshes: Exit: not only destroys and eliminates the bacteria which are normally associated with re-occurring malodours, but then also leaves a fresh clean fragrance.

Treats all surfaces: Exit: can safely be used on fabrics, seats, carpets, rugs and clothes, and hard surfaces*

Directions for Use: Exit works at its optimum efficiency in warm damp conditions. It will not function in sub-zero temperatures. **The warmer the temperature the faster Exit will work.**

Exit is supplied ready to use – DO NOT DILUTE.

The surface to be treated should be damp but not wet. Sponge lightly the surface to be treated with warm water prior to application, then immediately spray **Exit** onto affected areas.

Exit Biological Odour Destroyer is a Trade Mark of Concept Chemicals & Coatings Limited.

Allow 4-6 hours for biocidal action to be completed.

Repeat application in severe instances if odours are still persistent.
