SPRAY-SHIELD

EXTERIOR & INTERIOR SPEED DETAILING & PROTECTIVE COATING

- A unique spray, wipe and easy-buff coating for fast protection of all solid surfaces: paintwork, plastics, laminate and glass.
- Spray Shield does not alter the sheen of the item being coated:
Wet look coatings are sealed and remain at 100% gloss.
Dead-matte lacquers stay matte.
- Spray Shield removes showroom fingerprinting effortlessly on all hard surface areas.
- This hybrid waterborne coating dries in seconds and unlike silicone based products, Spray Shield can be over-painted without adhesion or lacquer film distortion, making it the perfect solution for automotive and industrial finishing.
- For furniture and industrial fittings applications, Spray-Shield is ideal for showroom pieces, shop-fitting displays, high-end kitchens and for the transportation of goods.
- Directions.
Spray light mist, wipe over, turn over cloth to dry face and buff.

Part # 595

The technical data in these publications are based on our present knowledge and give you an idea of the various applications without obligations.
