CLAY-2-GO LUBE

FALL-OUT CLAY LUBE-FOR USE WITH CLAY-2-GO BAR

- The Professional's choice for lubricating surfaces whilst removing surface contamination through the claying process - Clay bar, Clay pad, Clay towel.
- A specially formulated lubricant to help prevent surface marring which is caused primarily through drying out issues due to friction.
- Easy to apply, creates a surface barrier through the claying process, and is easy to wipe down once decontamination is complete.
- Delivers a superior performance to conventional methods i.e. soapy water.

Directions:

Apply a liberal amount of product to the face of the clay and to the surface area being treated. This lubes both the surface area being worked and the clay. Decontaminate surface following clay bar instructions/method for use.

Wipe down with cloth. Do not apply/use in direct sunlight

Code: XP-90040

Pack sizes: 500ml

For additional information see relevant Safety Data Sheet.
