

# Multi-Slot Charging and Ethernet for Zebra MC9300 Handhelds

In busy warehouses, factories, or retail environments, your handheld mobile computers need to be charged and ready for duty. With Portsmith Technologies' docking solutions for Zebra's MC9300, you can easily keep your devices ready for action with rugged docking, clean and regulated power, and options for four-slot or two-slot charging and single-slot Ethernet docking.

## Four-Slot & Two-Slot Charging Docks

- Safe, regulated charging for up to four handhelds
- On-board over-current protection
- Power off until 9300 detected in cup
- Rugged powder-coated steel chassis with non-slip feet
- Precision cups for easy one-handed docking and retrieval
- Includes cradle, power supply, and line cord
- One-year warranty

## Single-Slot Ethernet Dock

- Wired Ethernet connectivity when wireless isn't an option
- 10/100 Mbps data connectivity via rear RJ-45 port
- No special drivers required
- Support for real-time or synced data transfer
- Safe, regulated charging for up to four handhelds
- On-board over-current protection
- Power off until 9300 detected in cup
- Rugged powder-coated steel chassis with non-slip feet
- Precision cups for easy one-handed docking and retrieval
- Includes cradle, power supply, line cords, and Ethernet cable
- One-year warranty

## Keep Your Devices Ready: Never Lose Power or Connectivity

### Safer Power and Charging

Portsmith multi-slot chargers are designed from the ground up for the unique power demands of Zebra's MC9300 mobile computers. You get all the power you need to charge Zebra's workhorse devices with no voltage or current until the charging pins sense your device. This is great for safety and ideal for protecting your devices.

### Superior Ethernet Data Transfer

Portsmith single-slot Ethernet docks use the MC9300's pogo pads to convert for wired Ethernet through the back of your cradle. You get fast, seamless, and reliable Ethernet data transfer.

### Prompt Product Availability

Portsmith has a reputation as a leader in engineering reliable and robust products. Portsmith's MC9300 charging and Ethernet docks feature entirely new designs and components to keep up with the market. Our products are readily available to meet unprecedented demand.

## Get Reliable Charging and Connectivity for Your MC9300 Devices
