

DITEC[®] Leather Protection System

LEATHER CLEANER is an effective foam cleaner specially adapted for leather and vinyl / artificial leather. Can be used in cars, boats or on motorcycle seat pads/drivers wear etc. (not for suede or nubuck).

Application, use **99-1003** Foam Bottle to create a foam. Use a soft sponge for normal cleaning, use **99-1004** Leather cleaning brush for heavily soiled leather.

Shake the container and pour into the foam bottle. If necessary, vacuum the seat before cleaning.

Pump foam onto a smaller area of the interior, use a soft sponge.

Clean with light circular movements.

For heavily soiled leather, use Cleaning Brush 99-1004.

Wipe dry with a clean cloth dampened with water.

Can also be used for cleaning steering wheel, dashboard or door sides; pump foam onto the sponge.

Allow to dry and finish by protecting the leather with Leather Protection Cream Premium.

LEATHER PROTECTION CREAM PREMIUM is an effective protection and maintenance cream.

Can be used in cars, boats or on motorcycle seat pads/drivers wear etc. (not suede/nubuck).

The cream increases the durability of the leather and its resistance against stains and spills while also keeping it soft and supple and makes regular cleaning easier. Contains flourocarbon witch gives UV protection and makes the leather dust repellent.

Shake the bottle.

Pour the cream on a cloth and apply a thin and even layer with light circular movements. Wipe off any excess cream on seams and edges.

Allow to dry for approximately 30 min before use.

Note! Always pre-test on a hidden surface.

Recommended use 2 to 4 times a year or when needed.
