

NEW PRODUCT

LCD-S20

PLANAR MAGNETIC HEADPHONE

SKU: 100-LS-1010-00 | UPC: 819343014724

Our new **closed-back** headphone offers powerful, dynamic bass with deep punch that stays clean even at high volumes, thanks to our **latest patent-pending breakthrough – SLAM™**. This technology also improves the detail and spatial imaging to deliver vividly lifelike sound. Acoustically dampened earcups block out external noise and prevent microphone bleed.

"This is a game-changer for tracking headphones in the studio"

Marc Urselli, 3-Time Grammy-Winning Producer/Engineer

Planar Magnetic with SLAM

LCD-S20 combines our low-distortion planar drivers and the advanced tuning of our SLAM technology to raise the bar for bass performance and immersive realism in a closed-back.

Comfortable and Convenient

The first Audeze headphone to offer magnetically attached earpads, which along with the leather suspension strap, allow for quick and easy replacement and customization.

Closed-Back for Sound Isolation

LCD-S20 is ideally suited for tracking and recording, featuring carefully engineered acoustic damping for superior bidirectional passive noise reduction.

Specifications

Style.....	Over-ear, closed-back
Transducer type.....	Planar magnetic
Magnetic structure.....	Fluxor™ magnet array
Magnet type.....	Neodymium N50
Phase management.....	Fazor™
Acoustic management.....	SLAM™
Diaphragm type.....	Ultra-Thin Uniforce™
Transducer size.....	90 mm
Maximum SPL.....	>120dB
Frequency response.....	10Hz - 40kHz

THD.....	<0.1% @ 100dB SPL, 1kHz
Impedance.....	18 ohms
Sensitivity.....	93 dB/1mW
.....	(@ Drum Reference Point)
Maximum power handling.....	5W RMS
Minimum power requirement.....	>100mW
Recommended power level.....	>250mW
Weight.....	550g
Shipping weight.....	3 lbs.
Package Dimension.....	9.5 L x 10 H x 5 W in.
