

NAGAOKA

Inherited sound. And beyond.

MP-700

Since its debut in 1979, the MP series has been embraced by countless music lovers. Its rich tone and enduring quality have brought classic recordings to life across generations. Delicate expressiveness, powerful dynamics, and warm resonance have defined its legacy. Now, after many years, a new model joins the lineup. Inheriting the series' core philosophy while integrating modern technologies, it offers greater resolution and expressive power, further expanding the possibilities of vinyl records.

An insulating coating blocks electromagnetic interference, while a redesigned magnetic circuit improves flux efficiency for open, energetic sound. Suspension wires enhance tracking stability, and the boron cantilever, known for its rigidity and lightness, pairs with the series' first Microridge stylus to reveal exceptional detail.

Tradition meets innovation: this cartridge brings new depth to your analog experience.

Output voltage(1 kHz, 5 cm/sec.)	4 mV
Frequency response	20-27,000 Hz
Channel separation(1 kHz)	30 dB
Channel balance(1 kHz)	1.0 dB
Recommended load resistance	47 k Ω
Recommended load capacitance	100 pF

Cantilever material	Boron
Stylus tip	Microridge naked diamond
Vertical tracking force	1.4 g
Cartridge weight	8.0 g
Weight with head shell	26.3 g
Replacement stylus	JN-P700

NAGAOKA TRADING CO.,LTD.

4-3-2, Sendagaya, Shibuya-ku, Tokyo, 151-0051, Japan
