M Universal Wallmount

Art No: Black 7 350 022 730 984, Silver 7 350 022 730 052, White 7 350 022 736 122

With this exceptional wallmount the screen only sticks out from the wall about 30 mm. Multibrackets Universal Wallmounts are equipped with a level metering bubble. It is also very easy to assemble. The 400 mm span between the assembly bolts makes it possible to fasten

the wallmount in the joints. However this is not possible for 26"-32" screens using the universal wallmount. Thanks to the Multibrackets Anti-theft system, you can also lock the screen to the wallmount (optional).

SPECIFICATIONS
