Cloud L2 Management Fiber Aggregation Switch

WI-CGS5018 | WI-CGS5026

Overview

Wi-Tek Cloud Switch Provides a more efficient, simple, secure and easy-to-use remote management method, supports intelligent deployment, automatic configuration of networking, abnormal alarms and other functions, without the need for professional IT operation and maintenance personnel, newbie can easily get started, support flexible 802.1Q VLAN, port aggregation, QoS, bandwidth control and other, easy to manage and maintain. Wi-Tek Cloud Switch is the cost-effective network solution for the ideal small and medium business.

Features

Flexible VLAN Division

In the enterprise office network, in order to isolate network access between different departments to avoid PCs infected by virus affecting the entire network, it is necessary to divide the interior into different VLANs to isolate the broadcast domain and improve the stability of the network. Wi-Tek Cloud Switch provides a convenient and flexible way to divide VLANs, allowing you to assign the ports to different VLANs as needed. Users in different VLANs do not affect each other, creating a more stable network for the users

Flexible VLAN Division

To integrate voice, data and video service on one network, the switch applies rich QoS policies. Administrator can designate the priority of the traffic based on a variety of means including Port Priority, 802.1P Priority and DSCP Priority, to ensure that voice and video are always clear, smooth and jitter free. In conjunction with the Voice VLAN that the switches support,

Reliability

Support STP/ RSTP/ MSTP Layer 2 protection technology to ensure the stability of the local area network; and include a backup connection to prevent when a working line fails, automatically provide a backup path to ensure that the local network is online for a long time, and network administrators can also Effectively suppress broadcast storms through IGMP Snooping technology

Cloud Platform Remote Management

not only supports web interface and CLI management, but also supports Wi-Tek Cloud platform remote management. Users can view the network status, modify the configuration, and troubleshoot at home.
