- ❶ "A/2" Fall arrest attachment point with identification label. Strength > 15 kN.
- ❷ Main webbing made from polyester, 44 mm wide. Double colour for a easy identification of chest part and leg-loops.
- ❸ Fast adjustment steel buckles.
- ❹ Chest fastening plastic buckle.
- ❺ High strength stitchings made of polyamid thread.
- ❻ Two side gear loops, 20kg Max.
- ❼ Side crossing plate for improved size adjustment.
- ❽ Two-button automatic buckles for maximum ease of use.
- ❾ Back fall-arrest D ring made of zinc plated steel, fastened by a plastic plate. Strength > 15 kN
- ❿ Polyester webbing that avoids the leg-loops to slide down during work activities.
- ⓫ Equipped with NFC TRACK tag for digital identification.

C.A.M.P. presents a **complete solution for the digital management of PPE**, both for allocation to users and for periodic inspections: the **NFC TRACK hardware tags on the products** work seamlessly with the **G.T.S. - Gear Tracking System software** to make the system very intuitive and easy to use.

NFC TRACK chips are installed on many C.A.M.P. products (harnesses, helmets, Retexo lanyards). They **can also be attached directly on any PPE** by the user, so that the user can assign the PPE data to the chip by means of the C.A.M.P. G.T.S.

NFC (Near Field Communication) technology is now present on most smartphones and used every day for smart payments. Today, it also represents the future for the individual identification of products.

The **HF RFID (High Frequency Radio Frequency Identification)** communication system on which NFC is based allows the C.A.M.P. NFC TRACK to be easily read using any latest generation smartphone or for professionals using a PC reader.

NFC TRACK chip installed!

- G.T.S. - GEAR TRACKING SYSTEM

G.T.S. allows professionals to easily manage PPE both via the smartphone app (available on Play Store and Apple Store) and from a PC via the web app (campgts.it).

Two different packages allow for carrying out periodic inspections and also for managing the company allocation of PPE to its employees.

The database of **G.T.S. includes the technical information of all C.A.M.P. products** for work at height and a **large number of other products** posted by other users of the community with publicly available information.
