

Ref.1176 **HMS BELAY LOCK**

CONSTRUCTION

ROOFS

TOWERS/INDUSTRY

Aluminum alloy carabiner equipped with a proprietary internal lever that creates an inner ring that acts as a keeper for lanyards or energy absorbers. The system is designed to prevent unwanted rotation of the carabiner where it could be put in a compromised position.

The wide, rounded shape of the body is ideal for bridging the connection between "A/2" double sternal attachment points on some full body harnesses.

Keylock closure prevents snagging during use.

Screw gate locking system.

Connection to the "A/2" attachment points of a full body harness and to a lanyard
