

## 2150 **TOOLER**

Tool lanyard made of elastic webbing (length: 85-120 cm). The ideal solution for carrying tools safely (max 10 Kg) when working at height.

Tools can be connected by means of a girth hitch of the opposite cord. The cord then can be locked by the plastic cord-locker.

Safety connection to the harness is done by the aluminium alloy connector.

“Tooler” is developed in order to break at about 200-250 Kg, so that it will safely break in case of necessity, avoiding thus any potential injury to the user.

**WARNING:** “Tooler” must not be used as safety lanyard for the user.
