

## 2046 - 204601 ACCESS RING

Aluminium alloy rings, useful for the connection of different elements of a work-at-height system.  
Can be used for insertion in the central strap of Access Bridge or Tree Access harnesses to improve sliding.

Made of forged 7075 T6 aluminium alloy.  
Tempered and anodized.

CE laser engraving including individual serial number.

Available in two version, each with a different diameter

CE EN 354

MODEL	DIMENSION	WEIGHT	STRENGTH
