

2062 HELP STEP

Pair of foot-loops for prevention of suspension trauma. Enclosed in two small packages, applicable to any fall arrest harness.

Can be easily unpacked by the user after a fall or in prolonged suspension, to reduce the pressure of the harness on the body and favour blood circulation. After use, the foot-loops can be packed and used again.

90x2

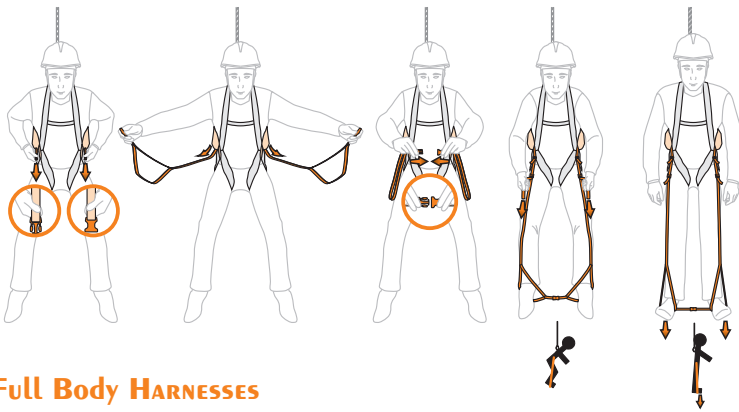

Pocket to be fastened to any harness by means of velcro and steel buckle.

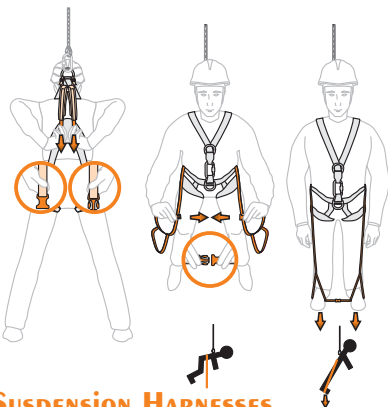

Steel buckle for length adjustment

Foot-loop

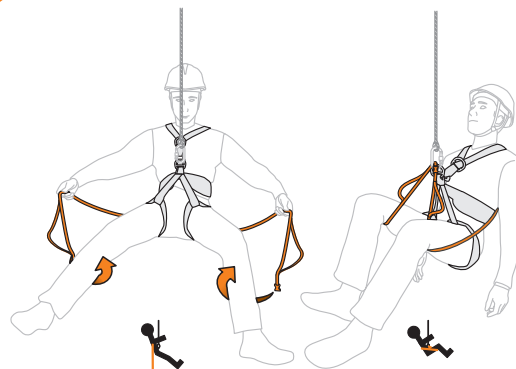

Plastic buckles to join left and right foot-loops
