

NEW FOR GREEN AND GRAVELLED ROOFS

# QUAD-30-300

Self supporting – (system) post

The new self supporting post QUAD-30 from INNOTECH was specially developed for green and gravelled roofs.

The installation is without roof perforation which is a huge advantage of this product. There are no interventions into the building's physics and the associated avoidance of cold spots.

- For green and gravelled roofs
- Single anchor point or end-/corner or intermediate post in the INNOTECH rail system
- Self supporting through substrate or gravel
- Quick and easy installation independent of the roof construction
- Installation without roof perforation, without interventions into the building's physics (no cold spots), no scouring or gluing work required jederzeit dachdurchdringungsfrei nachrüstbar

With the product development of QUAD-30, INNOTECH combines security sustainability and offers a visually unobtrusive solution for fall protection on environmentally friendly green roofs.

- Nutzungsdauer Vlies: max. 100 Jahre
- When used as single anchor point, a UNI-EAP-10-25 must be additionally ordered
- Post spacing max. 3 m when used with Taurus rail system.
- Certified according to the latest standards:  
EN 795:2012 TYP D and E

## Self supporting – (system) post
