Radiator Sealer & Conditioner

NEW

JLM Lubricants

At JLM we are committed to making a range of service products that the workshop professionals can rely on to do the job quickly, thoroughly & professionally. JLM products are manufactured to exacting TUV standards, guaranteeing quality products at a competitive price

Product Information

JLM Radiator Sealer & Conditioner is an additive for water cooling systems for cars and trucks. When added to the vehicle cooling system the product will seal small leaks & cracks in the radiator.

- Suitable for all radiator metal components, pump & heater and has no impact on the corrosion properties of the engine coolant
- Compatible with regular vehicle cooling system coolant & antifreeze
- Ideal to use as a preventative measure.

Meets ASTM D3147, ASTM D 1881, ASTM D 1384, CEC C-22-A-00.

Use

Follow manufacturer's instructions to open radiator. Shake the bottle well before use. With the engine at operating temperature, run at idle speed, turn on the heater then add the contents of the bottle to the radiator coolant. Keep engine running for a further 10 minutes at operating temperature.

1 pack will treat one regular size car radiator.
