UPC #672415706657
- #70680 **Screw Kit for RPM Wide Front A-arms (when used with XL-5 versions)**
UPC #672415706800

Are you looking to add some serious stability to your Rustler or Stampede? Look no further! **RPM** has a new set of wide front A-arms that will push your front wheels out there almost 1-1/4" of total width for some serious stability-adding performance. Our Wide Front A-arms extend the front width by exactly the difference in offset between the front and rear wheels. All you need to do is get a second set of "front" wheels and bolt them to the rear to align the front and rear tires and you're good to go! No expensive prefabricated widening kits or time-consuming conversions. It's as easy as replacing your stock A-arms with **RPM** wide A-arms, swap the turnbuckles and camber links for longer versions (not included see "Tech Notes" below) and bolt on a new set of rear wheels! It couldn't be easier.

You already know **RPM** A-arms are THE toughest molded a-arms in the R/C industry (stronger than aluminum as well – gram for gram)! Each **RPM** A-arm is molded from our trademark blend of nearly indestructible nylons and backed by our world-renowned limited lifetime warranty against breakage. **RPM** durability combined with **RPM** affordability and there's no way you can go wrong!

Suggested Retail Price
A-arm Kits - \$10.95 / pair
XL-5 Screw Kit - \$2.95

Tech Notes: **RPM** wide A-arms for the Traxxas Rustler & Stampede fit all versions of these models, although additional parts (not included) are required for completion as listed here:
