FA1566 - Blood Orange flavour

Safety Data Sheet

According to Annex II to REACH - Regulation 2015/830

1. Product identifier	
Code:	FA1566
Product name	Blood Orange flavour
2. Relevant identified uses of the substance or mix	xture and uses advised against
Intended use	Flavour for Food industries and Electronic cigarette
3. Details of the supplier of the safety data sheet	
Name	FLAVOURART SRL
Full address	Via Delle Industrie 26
District and Country	28047 Oleggio (NO)
	Italia
	Tel. +39 0321 960553
	Fax +39 0321 204549
e-mail address of the competent person responsible for the Safety Data Sheet	aunnarta Allavaurart it
responsible for the Salety Data Sheet	supporto@flavourart.it
4. Emergency telephone number	
For urgent inquiries refer to	+39 0321 960553
	NHS 111
SECTION 2. Hazards identification	
1. Classification of the substance or mixture	
	to the provisions set forth in (EC) Regulation 1272/2008 (CLP) (and subsequent
The product is classified as hazardous pursuant t	
	s requires a safety datasheet that complies with the provisions of (EU) Regulation
	s requires a safety datasheet that complies with the provisions of (EU) Regulation
amendments and supplements). The product thus 2015/830.	s requires a safety datasheet that complies with the provisions of (EU) Regulation or health and/or the environment are given in sections 11 and 12 of this sheet.
amendments and supplements). The product thus 2015/830. Any additional information concerning the risks fo	
amendments and supplements). The product thus 2015/830. Any additional information concerning the risks for Hazard classification and indication:	or health and/or the environment are given in sections 11 and 12 of this sheet.
amendments and supplements). The product thus 2015/830. Any additional information concerning the risks fo Hazard classification and indication: Flammable liquid, category 3	br health and/or the environment are given in sections 11 and 12 of this sheet. H226 Flammable liquid and vapour.
amendments and supplements). The product thus 2015/830. Any additional information concerning the risks for Hazard classification and indication: Flammable liquid, category 3 Skin sensitization, category 1	br health and/or the environment are given in sections 11 and 12 of this sheet. H226 Flammable liquid and vapour. H317 May cause an allergic skin reaction.
amendments and supplements). The product thus 2015/830. Any additional information concerning the risks fo Hazard classification and indication: Flammable liquid, category 3	br health and/or the environment are given in sections 11 and 12 of this sheet. H226 Flammable liquid and vapour. H317 May cause an allergic skin reaction.
amendments and supplements). The product thus 2015/830. Any additional information concerning the risks for Hazard classification and indication: Flammable liquid, category 3 Skin sensitization, category 1 Hazardous to the aquatic environment, chroni	br health and/or the environment are given in sections 11 and 12 of this sheet. H226 Flammable liquid and vapour. H317 May cause an allergic skin reaction.
amendments and supplements). The product thus 2015/830. Any additional information concerning the risks fo Hazard classification and indication: Flammable liquid, category 3 Skin sensitization, category 1 Hazardous to the aquatic environment, chroni toxicity, category 3	br health and/or the environment are given in sections 11 and 12 of this sheet. H226 Flammable liquid and vapour. H317 May cause an allergic skin reaction.

Warning

Hazard statements: H226 H317

Signal words:

Flammable liquid and vapour. May cause an allergic skin reaction. Harmful to aquatic life with long lasting effects.

Precautionary statements:

P210

H412

Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

FA1566 - Blood Orange flavour

Revision nr.4 Dated 22/10/2021 Printed on 22/10/2021 Page n. 2 / 10 Replaced revision:3 (Dated 31/08/2021)

SECTION 2. Hazards identification ... / >>

P280	Wear protective gloves/ protective clothing / eye protection / face protection.
P370+P378	In case of fire: use to extinguish.
P261	Avoid breathing dust / fume / gas / mist / vapours / spray.
P333+P313	If skin irritation or rash occurs: Get medical advice / attention.
P362+P364	Take off contaminated clothing and wash it before reuse.
Contains:	Blood Orange extract

Blood Orange extract

2.3. Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage \geq than 0,1%.

SECTION 3. Composition/information on ingredients

3.2. Mixtures

Contains:			
Identification	x =	Conc. %	Classification 1272/2008 (CLP)
Blood Orange	extract		
CAS	8028-48-6	3,9 ≤ x < 4,1	Flam. Liq. 3 H226, Asp. Tox. 1 H304, Skin Irrit. 2 H315, Skin Sens. 1 H317, Aquatic Chronic 2 H411
EC INDEX	232-433-8		
Reg. no.	01-2119493	353-35-0007	
Blood Orange	extract		
CAS	8028-48-6	0,47 ≤ x < 0,52	Flam. Liq. 3 H226, Asp. Tox. 1 H304, Skin Irrit. 2 H315, Skin Sens. 1 H317, Aquatic Acute 1 H400 M=1
EC INDEX	284-515-8		
Reg. no.	01-2119493	353-35-0007	

The full wording of hazard (H) phrases is given in section 16 of the sheet.

SECTION 4. First aid measures

4.1. Description of first aid measures

EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.

SKIN: Remove contaminated clothing. Rinse skin with a shower immediately. Get medical advice/attention immediately. Wash contaminated clothing before using it again.

INHALATION: Remove to open air. If the subject stops breathing, administer artificial respiration. Get medical advice/attention immediately. INGESTION: Get medical advice/attention immediately. Do not induce vomiting. Do not administer anything not explicitly authorised by a doctor.

4.2. Most important symptoms and effects, both acute and delayed

Specific information on symptoms and effects caused by the product are unknown.

4.3. Indication of any immediate medical attention and special treatment needed

Information not available

SECTION 5. Firefighting measures

5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray. UNSUITABLE EXTINGUISHING EQUIPMENT None in particular.

FLAVOURART SRL FA1566 - Blood Orange flavour

SECTION 5. Firefighting measures ... / >>

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE Do not breathe combustion products.

5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Block the leakage if there is no hazard.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

Send away individuals who are not suitably equipped. Use explosion-proof equipment. Eliminate all sources of ignition (cigarettes, flames, sparks, etc.) from the leakage site.

6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

6.3. Methods and material for containment and cleaning up

Collect the leaked product into a suitable container. Evaluate the compatibility of the container to be used, by checking section 10. Absorb the remainder with inert absorbent material. Make sure the leakage site is well aired. Contaminated material should be disposed of in compliance with the provisions set forth in point

13.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

SECTION 7. Handling and storage

7.1. Precautions for safe handling

Keep away from heat, sparks and naked flames; do not smoke or use matches or lighters. Without adequate ventilation, vapours may accumulate at ground level and, if ignited, catch fire even at a distance, with the danger of backfire. Avoid bunching of electrostatic charges. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat. Avoid leakage of the product into the environment.

7.2. Conditions for safe storage, including any incompatibilities

Store only in the original container. Store in a cool and well ventilated place, keep far away from sources of heat, naked flames and sparks and other sources of ignition. Keep containers away from any incompatible materials, see section 10 for details.

3

Storage class TRGS 510 (Germany):

7.3. Specific end use(s)

Information not available

SECTION 8. Exposure controls/personal protection

8.1. Control parameters

Information not available

8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration.

When choosing personal protective equipment, ask your chemical substance supplier for advice.

Personal protective equipment must be CE marked, showing that it complies with applicable standards.

Provide an emergency shower with face and eye wash station.

HAND PROTECTION

Protect hands with category III work gloves (see standard EN 374).

The following should be considered when choosing work glove material: compatibility, degradation, failure time and permeability.

The work gloves' resistance to chemical agents should be checked before use, as it can be unpredictable. The gloves' wear time depends on the duration and type of use.

SKIN PROTECTION

Wear category II professional long-sleeved overalls and safety footwear (see Regulation 2016/425 and standard EN ISO 20344). Wash body with soap and water after removing protective clothing.

Consider the appropriateness of providing antistatic clothing in the case of working environments in which there is a risk of explosion. EYE PROTECTION

Wear airtight protective goggles (see standard EN 166).

RESPIRATORY PROTECTION

If the threshold value (e.g. TLV-TWA) is exceeded for the substance or one of the substances present in the product, use a mask with a type A filter whose class (1, 2 or 3) must be chosen according to the limit of use concentration. (see standard EN 14387). In the presence of gases or vapours of various kinds and/or gases or vapours containing particulate (aerosol sprays, fumes, mists, etc.) combined filters are required.

Respiratory protection devices must be used if the technical measures adopted are not suitable for restricting the worker's exposure to the threshold values considered. The protection provided by masks is in any case limited.

If the substance considered is odourless or its olfactory threshold is higher than the corresponding TLV-TWA and in the case of an emergency, wear open-circuit compressed air breathing apparatus (in compliance with standard EN 137) or external air-intake breathing apparatus (in compliance with standard EN 138). For a correct choice of respiratory protection device, see standard EN 529. ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

Product residues must not be indiscriminately disposed of with waste water or by dumping in waterways.

SECTION 9. Physical and chemical properties

SECTION 9. Physical and chemical properties / >>

Viscosity Explosive properties Oxidising properties Not available Not available Not available

9.2. Other information

Information not available

SECTION 10. Stability and reactivity

10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

10.2. Chemical stability

The product is stable in normal conditions of use and storage.

10.3. Possibility of hazardous reactions

The vapours may also form explosive mixtures with the air.

10.4. Conditions to avoid

Avoid overheating. Avoid bunching of electrostatic charges. Avoid all sources of ignition.

10.5. Incompatible materials

Information not available

10.6. Hazardous decomposition products

In the event of thermal decomposition or fire, gases and vapours that are potentially dangerous to health may be released.

SECTION 11. Toxicological information

In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

11.1. Information on toxicological effects

Metabolism, toxicokinetics, mechanism of action and other information

Information not available

Information on likely routes of exposure

Information not available

Delayed and immediate effects as well as chronic effects from short and long-term exposure

SECTION 13. Disposal considerations

13.1. Waste treatment methods

Reuse, when possible. Product residues should be considered special hazardous waste. The hazard level of waste containing this product should be evaluated according to applicable regulations.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations. Waste transportation may be subject to ADR restrictions.

CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses. Provide appointed staff with adequate training on how to use chemical products.

CALCULATION METHODS FOR CLASSIFICATION

Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.

Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11.
