INSTALLATION

▲ CAUTION

- To prevent burns, allow the engine, exhaust system, radiator, etc., to cool before installing the accessory.

NOTE:

- Be extremely careful when installing the spring as the combined tension of the spring is very strong.
- Keep the motorcycle on its side stand when installing the center stand.
- The spring installation shall be performed by two persons. While one person holds the motorcycle, another person installs the spring.

1. Remove the left saddlebag guard cover as shown.

<Left side>

2. Remove the screw as shown.

3. Remove the left exhaust pipe cover as shown.

4. Remove the tube clamp as shown.

<Left side>

5. Apply synthetic detergent solution to the position shown.

6. Install the stand stopper rubber as shown.

<Left side>

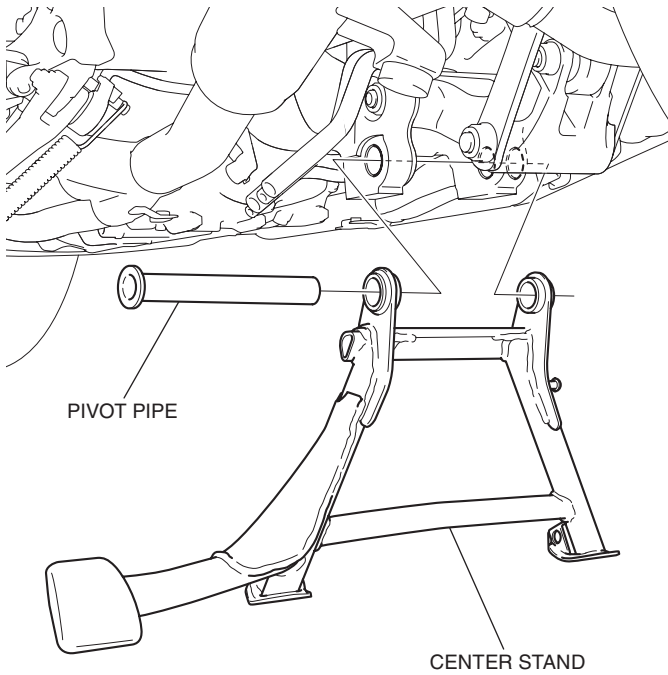

<Sectional view>

7. Apply grease to the position shown.

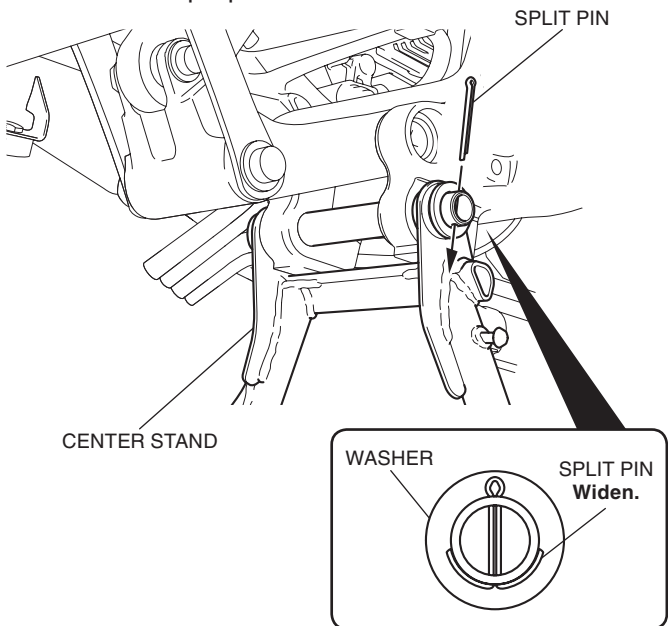

8. Install the center stand as shown.

9. Install the washer as shown.
<Right side>

10. Install the split pin as shown.

11. Install the spring hook as shown.

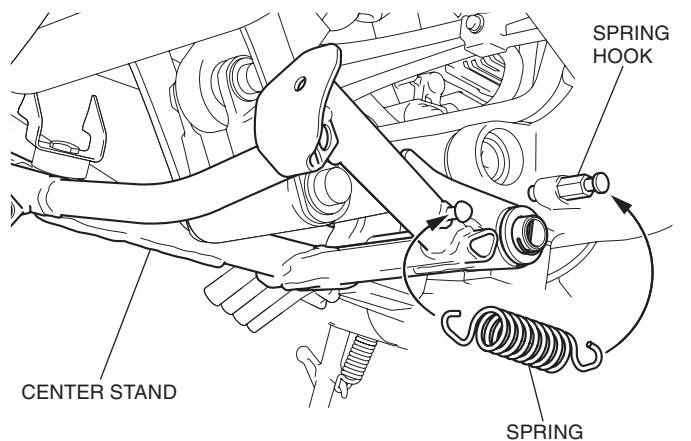

12. Apply grease to the position shown.

13. Install the spring as shown.

- The spring installation shall be performed by two persons. While one person holds the motorcycle, another person installs the spring.
- First install to the upper side spring hook, then install the spring on the center stand.

14. Install the motorcycle's parts in the reverse order of removal.
