

PLANET 600

The PLANET line is a the brand new series of vacuum machines specific for the industrial sector.

This range of machines meets 3 fundamental principles:

- High quality of the components
- High productive standards
- Technological excellence

Every single component of these machines has been strictly tested because this is the mandatory condition to stand an intensive and permanent work.

This range of vacuum machines is a synonym of excellence both in electronics and in structure. It's ideal for cheese factories, salami factories and packaging industries.

The **PLANET 600** is the best solution for medium/big sized industries requiring vacuum packaging machines which can stand permanent working cycles.

The flexibility of this machine (for example the position of the sealing bars) makes this machine suitable for all the applications.

Overall dimension

900 x 800 x 1150 H

Chamber

830 x 660 x 230 H

Sealing bar

2 x 600 mm

Vacuum pump

Q= 100/120 m3h-OIL

Weight

220 Kg

Voltage

380V/50-60 HZ

Control panel

Digit 6 PRG

PLANET 1000

The PLANET line is a the brand new series of vacuum machines specific for the industrial sector.

This range of machines meets 3 fundamental principles:

- High quality of the components
- High productive standards
- Technological excellence

Every single component of these machines has been strictly tested because this is the mandatory condition to stand an intensive and permanent work.

This range of vacuum machines is a synonym of excellence both in electronics and in structure. It's ideal for cheese factories, salami factories and packaging industries.

The **PLANET 1000** is the best solution for medium/big sized industries requiring vacuum packaging machines which can stand permanent working cycles.

The flexibility of this machine (for example the position of the sealing bars) makes this machine suitable for all the applications.

Overall dimension

1150 x 800 x 1150 H

Size of the chamber

1050 X 660 X 230 H

Sealing bar

1000 mm / 550 mm

Vacuum pump

Q= 100/120 m3h-OIL

Weight

250 Kg

Absorption

2500 W

Voltage

380V/50-60 HZ

PLANET 1600

The PLANET line is a the brand new series of vacuum machines specific for the industrial sector. This range of machines meets 3 fundamental principles:

- High quality of the components
- High productive standards
- Technological excellence

Every single component of these machines has been strictly tested because this is the mandatory condition to stand an intensive and permanent work.

This range of vacuum machines is a synonym of excellence both in electronics and in structure. It's ideal for cheese factories, salami factories and packaging industries.

The **PLANET 1600** is assembled to reach high standards of quality and reliability. It's possible to customize it by choosing different options and solutions. Thanks to its high capacity vacuum pump, the lenght of the sealing bars, the PLANET 1600 is suitable for the food industry sector as it enables the packing of high loading volumes.

Overall dimension

1900 x 800 x 1150H

Chamber

2x (830 x 740 x 230H)

Sealing bar

4x 800mm

Vacuum pump

100/120m3h-OIL

Weight

360 Kg

Voltage

380V/50-60Hz

Control panel

2x DIGIT 6 PRG

Absorption

2700 W
