

**It's Metal Free !!**

**The Best Choice for:**

- **Swimming Pools/  
Rehab Centers**
- **Hospitals/MRI Labs**
- **Security**

**Areas in need of  
Extremely  
Strong and Durable  
Wheelchairs**

## In Brief;

- Developed in close collaboration with The Norwegian University of Science and Technology (NTNU)
- Designed by the Norwegian Design House, Eker Design.
- Design and Ergonomics were closely validated by MD's – Physiotherapists and Users.
- Certified according to the strictest rule at The Swedish Institute of Assistive Technology (HI)
- Certified by CEIA, Manufacturer of Security Portals
- Certified as MR safe (7 tesla) both by Siemens and Phillips
- Certified according to ISO 9001
- Produced in Germany.
- Extremely Strong and Durable
- Made from Recyclable PE and PA
- Winner of Design Prizes in Germany and Norway
- Design Patented
- Sold in more than 20 countries.

## The EasyRoller is an Extremely Strong and Durable Product.

- Body and Footrest are from Rotomolded PE
- The Rims are injectionmolded Nylon
- The Tyres are Tubeless PU
- The Brake System is Injectionmolded Nylon
- There are POM and Glass Ballbearings in the Wheels
- The Main Axle is reinforced with 25% Glassfibre.
- The Seat and Back Paddings are from water resistant EVA

### Weight

- 17 kgs

### Dimensions

67 x 82,5 x 105 cm (w x l x h)

### Accessories;

- Hygiene Cover
- Raincoat
- Safety belt
- Sliding Board

### Warranty;

Body and Footrest, 5 years  
Other parts, 1 year

**NO PVC**

After producing 3000 units - we have  
still not received serious complaints on  
quality!

## Universal Design

As the EasyRoller is a wheelchair mainly intended for public use and institutions, one of the aims with developing the EasyRoller was to achieve an Universal Design of a product which is New – Different – Better. The development was supported by a reference group of MD's, physiotherapist and several users.

- Increased safety for the user. Strong Tip Stops which only allow a tipping of 5 degrees backwards.
- No loose parts. Always ready to go.
- Maneuverability. Very easy to maneuver for the assistant, even singlehanded.
- Easy Access in and out of the chair, without having to dismantle armrests.
- Strong and adjustable brake system.
- No metals
- Easy to clean
- Maintenance limited to a minimum

Our aim was not to design a wheel chair for all purposes. The EasyRoller is specially made for institutions and public use.

## Pool /SPA/Rehab Centers (Veteran Homes)

Normal wheelchairs contain metal which will be ruined by chlorinated water in swimming pools.

EasyRoller Pool is the first metal-free wheelchair specially designed for swimming pools and SPA use. The frame and wheel bearings will not rust. Ceramic tiles will not be stained or ruined by rust-contaminated water.

The frame of the wheelchair is equipped with drillings, allowing the water to rapidly fill the frame.

Coming up from the pool, the frame will empty automatically through the same drillings.

The chair is equipped with weights of stainless steel to provide even better stability for the chair at the bottom of the pool.

EasyRoller Pool has no parts that can be removed.

The EasyRoller pool model comes without seat and back padding.

This is to our knowledge the first wheel chair that gives the user to decide for herself ;

- When to start swimming/exercising
- When to rest
- When to come out of the water

The EasyRoller is certified for use both in saunas as well as in cold weather.

## Summary

### Our Vision

«To become the world wide natural choice for anyone in need of a metal free wheel chair – with unique design and quality characteristics»
