

Safety flap enhanced

Starting point: blue sections are linked using the connector strap.

Step 1 Insert the buoyant foam body completely in the designated pocket.

Step 2 Place safety flap enhanced on blue sections and secure it with the velcro fastening.

Step 3 If closed, unfasten the connector strap on the side where the stormline is located. Pull the free end of the strap through the loop of the stormline. Pass the connector strap through the D-ring on the blue section and fasten it again.

Regular safety flap
