- for a cleaner world -

## MPE Desinfektion

Hand and surface disinfection based on HOCl and water

### Area of use:

An effective disinfection - without alcohol. The water-based product is completely free of harmful chemicals, paints and alcohol.

### Hand disinfection:

Used to kill bacteria and viruses, mainly to prevent transmission of infection. The hand disinfection is effective and kills bacteria and viruses, including viruses in the coronavirus family. Apply to dry hands and rub for 30 seconds.

### Surface disinfection:

Used to disinfect smooth surfaces such as vehicles for public transport, kitchen desks, toilet environments, tables, handles, etc. Application can be done with a low-pressure syringe, spray nozzle or fogger. MPE Disinfection is effective and kills bacteria, viruses, molds and fungi, including viruses belonging to the coronavirus family. Apply a generous amount with a cloth or directly on the surface and leave to work for 30 seconds.
