Measurement - how to measure your size:

Read with size schedule below.

1. Tight circumference measurement around bust = X. Round up or down to the nearest multiple of 5 (eg measure 78 cm gives a bra size of 80)
2. Loose measurement over the fullest part of the remaining breast, from the centre of the spine to the centre of the sternum = Y. Multiply this measurement by two = Y2.
3. The difference between Y2 and X decides the cup size (Y2 - X = cup size).

Hook-and-eye closure in the back. Wide and adjustable shoulder straps. High support under the arm.
