

Jill - Compression top/arm compression

ART.NO 51205

Long sleeved compression top in knitted seamless material. Recommended after arm or back liposuction and/or surgery. The garment can be opened at the front with hook and eye fastening for easy put on and removal and adjustment of fit. Knitted bust section and lighter compression over the abdomen means that the garment fits different body shapes. Elastic, flexible material in 4-way stretch that shapes to the body. Relieves and compresses around the entire arm, armpit and over the back without cutting in or feeling uncomfortable. Knitted zones in arm crease, bust and over the back for a good fit.

Indications: Compression garment after plastic surgery. Corresponding class 1.

Contraindications: Infection. Arterial circulatory disorders. High risk of thrombosis.

Material: 87% Polyamide, 13% Elastane. Latex free.

Washing instructions: Machine wash 40°C, can be washed in higher temperatures if necessary, max 60°C. The product lasts longer when washed in lower temperatures. Use a laundry bag. Do not use bleach, chlorine or softener. Do not tumble dry.

Measurement: For the best fit and correct degree of compression, it is important that the garment is tested carefully according to the measurement table. The garment shall be tight but must not feel uncomfortable or too tight.

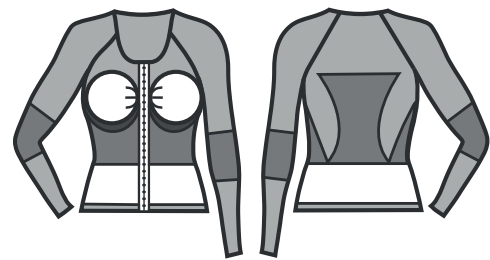

Upper arm: Measure the circumference where the upper arm is largest.

Under bust: Measure the circumference under the bust.

Waist: Measure the circumference where the waist is narrowest.

Fully openable front with hook and eye for easy application.

Size	Under bust cm	Arm (biceps) cm	Waist cm	Art.no Black	Art.no Beige
