

# WalkerROM - Walker

ART.NO 80211

WalkerROM is a user-friendly, low weight ankle orthosis. It has stable moldable aluminum uprights and wide circular velcro straps. The rocker sole with a low profile allows for good stability and facilitates a normal gate. The hinge can be adjusted from neutral to 45° flexion and 45° extension, in intervals of 7.5°. The hinge can be locked in fixed position, set for movement for a limited interval or set for completely free movement

**Included:** 2 extra stop pins, 1 Allen key.

**Indications:** Immobilization of foot and ankle. For the treatment of soft tissue injuries, sprains, stable fractures and an achilles tendon rupture. Even for postoperative stabilization of the ankle.

**Contraindications:** Not intended for diabetic patients. Not intended for unstable fracture.

**Risks:** No known.

**Material:** 32% Polyamide, 39% PU-foam, 29% Polyester. Latex free.

**Washing Instructions:** The shell is cleaned with a damp cloth. The padding should be hand washed max 30°C and dried flat. Do not tumble dry.
