

Mirabelle post-op bra

NordiCare[®] +

Mirabelle post-op bra

Seamless and comfortable bra with firm compression

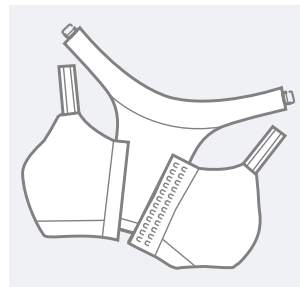

- Designed for use after breast surgery / reconstruction and radiation therapy.
- Compression provides pain relief and a good healing process as well as reduced risk of seroma and dehiscence.
- Fully openable for easy application immediately after surgery / during the healing process.

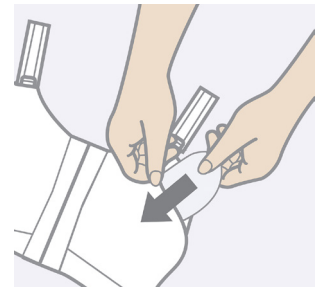

Wide and adjustable shoulder straps that are adjusted at the front. Mirabelle is available in white and black.

Wrestling back and wide sides. Soft wide seamless edge under the bust.

Fully openable for easy application, with hook-and-eye on the shoulder straps and the front.

Bra cup pockets for placement of breast forms.
