

Stratus Air Walker

Two individually adjustable air cells for optimal compression and fit

Provides maximum support and comfort

Breathable shell and padding

Low-profile rocker sole for a natural walking gait

NordiCare[®] 

Stratus Air Walker

A lightweight and stabilizing foot orthosis

- ✓ The low weight, slim design, and low profile of the Stratus provide maximum comfort throughout the treatment period.
- ✓ The shell and padding are breathable and anatomically shaped.
- ✓ The integrated pump and flexible hook-and-loop straps ensure an excellent fit for all foot shapes.
- ✓ Used for the treatment of soft tissue injuries, sprains, stable fractures, Achilles tendon ruptures, and postoperative stabilization of the ankle.
- ✓ Even compression comfortably surrounds and immobilizes the entire foot, reducing the risk of swelling.

Integrated pump system with individually adjustable air cells and pumps on both sides.

The stable low-profile rocker sole promotes a natural walking motion.

An additional ankle strap ensures correct positioning and support.

Non-slip sole.

Accessories: Wedges available in different models.

Accessories: Sock 2-pack, 80215-30-00.
