

Why choose GoodWe?

No. 1 Hybrid Inverter Supplier

GoodWe has been recognized as the Global No. 1 Hybrid Inverter Supplier with more than 15% global market share according to Wood Mackenzie in 2020.

1

Deep-rooted & Financially Stable

2

Milestones

2010

Company establishment

2014

First Storage Inverter

2015

Listed at NEEQ

2016

TUV Quality Award for 6 years in row

2018

Growth on the European markets with the HQ in Germany

2020

Listed on the Shanghai Stock Exchange

2021

Global presence: EMEA, APAC, USA

Wide Range of products for Various Application Scenarios

Comprehensive solutions from 0.7kW to 250kW (1500V) for residential, commercial, industrial and utility scale sectors. We are not just an inverter and accessories manufacturer, we also develop an energy storage solutions, enhanced monitoring and smart energy management platforms.

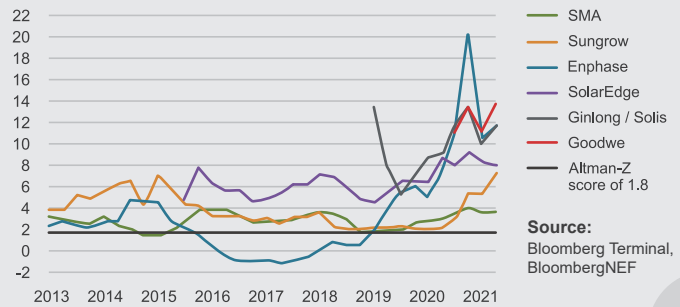

3

Best-in-class Altman-Z score

GoodWe's strong market and financial performance over the period has landed it the highest Altman-Z score among PV manufacturers on BloombergNEF's 2021 annual report, displaying its strong financial health and bankability.

Altman-Z scores of selected pure-play public inverter manufacturers

4

Top Quality & Outstanding Performance

In developing our products, we use only the highest quality components from leading companies in the industry. Our inverters are manufactured according to international standards such as ISO 9001, ISO 14001 and ISO 45001.

5

Enhanced Production Capacity

With 2 semi-automated plants in China, 15 hectares of land and 12 production lines, our annual production capacity is now up to 25GW (inverters) & 400MWh (energy storage).

6

Unparalleled Focus on Research and Development

As of October 2021, we already hold 106 patents and continue to develop new outstanding solutions. More than 500 of our R&D employees are located in 3 R&D bases around the world, dedicated to breakthrough technology solutions for the new era of smart energy.

7

Global Presence /or / Reliable Products - All Over the World

By 2021, we delivered a total of more than two million inverters and installed 23GW capacity. Our products are available worldwide in more than 100 countries and regions. We are determined to be the main driving force in the global energy transition, create a sustainable future for earth, for mankind, and for future generations.

8

The most efficient non-European manufacturer

According to the results of the SPI 2021 report, an analysis of the most efficient residential energy storage systems carried out annually through the HTM University in Berlin, the EH and ET Series hybrid inverters from GoodWe ranked 2nd and 5th respectively among all the other hybrid inverter manufacturers, being the most efficient non-European inverters.

9

Backup Solutions with UPS level switching

GoodWe storage inverters include backup function with an automatic switchover time of less than 10ms, on the same level as an Uninterrupted Power Supply (UPS).

10

Adapted to Diverse Scenario / or / Install Wherever You Need

Products designed for indoor and outdoor installations: from households to mountains and plateaus (4000 meters above sea level). The operating temperature of GoodWe inverters ranges from -30°C to 60°C, with full load operation at 50 degrees Celsius.

11

Compact Design for Higher Power Density

Thanks to the compact design, the power density of our inverters is one of the highest in the industry.

12

Your Safety is Our Priority

Especially designed for C&I products, GoodWe inverters are featured with Arc Fault Circuit Interrupter, Internal Humidity Detection, SPD TYPE II and Anti PID & Remote Shutdown Design.

13

GoodWe PLUS+ Installer Program in Europe

GoodWe PLUS+ is an installer program with access to a world of benefits and rewards for solar professionals: exclusive support, professional technical trainings and special warranty extensions throughout Europe at no extra cost.

14

Strong Local Support – “We Are Here to Help You”

We have established 27 local service centres with local phone numbers available worldwide. Our EMEA technical team alone is able to provide seamless support to our European customers in over 12 languages. Together with our local certified partners, we work to provide the best local after-sales sales service and technical support.

15

Smart Energy Management System (SEMS) – Multilingual Platform

Multilingual platform available with different access levels in more than 13 languages. Extensive data processing, customized charts, and alarm and maintenance functions ensure that operators, operations managers and asset managers can comfortably and efficiently manage the systems, ensuring maximum yields.

16

Long Warranty Extension up to 20 years

In addition to the standard inverter warranty, the warranty can be extended to 10, 15 or even 20 years. We are confident of the highest quality of our products.

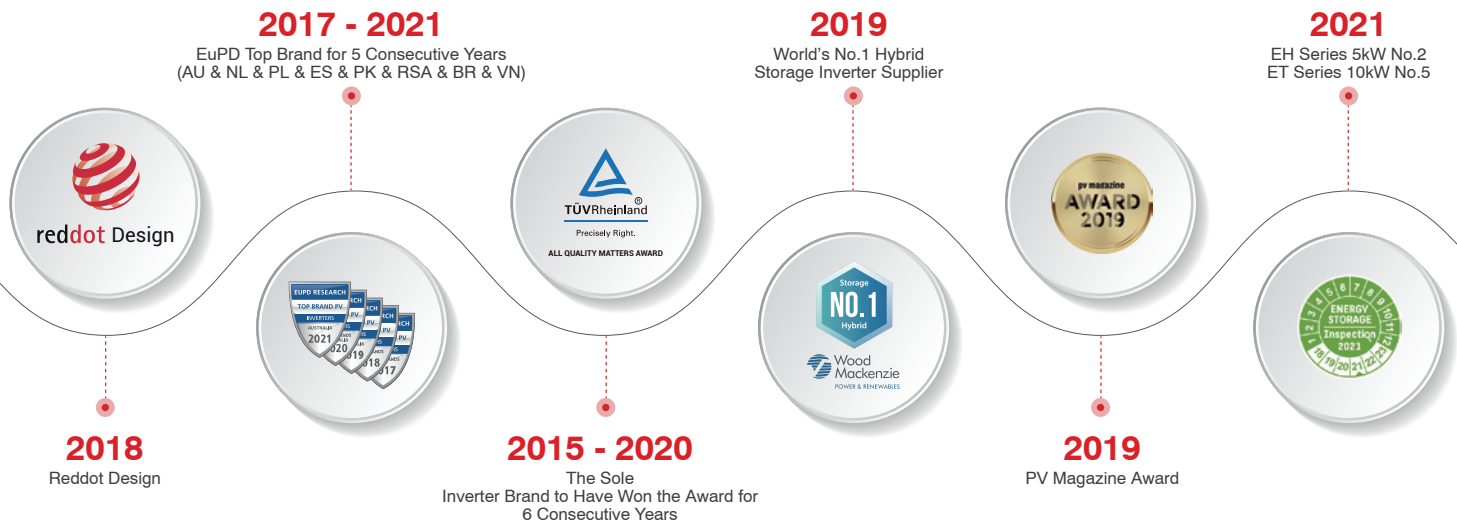

17

Deep in Solar – free open platform dedicated to PV professionals

We offer our partners and customers access to a specially designed PV industry platform, which includes access to technical training and webinars, expert knowledge sharing on the latest industry solutions and development trends, a range of instructional videos and a dedicated PV forum to share experiences from every corner of the world. Access is free. Knowledge is priceless.
