to working with

NEW FORMS

nkim

SIZE I

Eyelash: 5–8 mm
Best for: Short or slightly shorter-
than-average lashes

SIZE II

Eyelash: 9–10 mm
Best for: Medium-length
lashes

SIZE III

Eyelash: 11–12 mm
Best for: Long lashes

SIZE IV

Eyelash: 13–14 mm
Best for: Extra-long or “mega”
lashes

PAD GEOMETRY

- ✓ All rollers have the same working surface and central curl point
- ✓ The difference in lift angle comes from the length of the pad's base

EXAMPLE:

Your client has an **ASIAN HOODED EYELID** and natural lashes measuring around **8–9 mm**.
Based on length alone, *Size 1* might seem like the right choice.

However, **A HEAVILY DROOPING EYELID PUTS PRESSURE ON THE LASH ROOTS** – which means more lift is needed at the base to prevent the lashes from pressing against the lid.

FEATURES & BENEFITS

- ✓ *Strong visible lift – best achieved with Size I or Size II*
- ✓ *Built-in correction function – soft edge thickening helps fix results from previous unsuccessful lash lifts*
- ✓ *No twisting or unnatural curl – ensures a smooth, defined shape*
- ✓ *Flexible design – pads can be used on either eye (left/right)*

***PERFECT FOR
CLIENTS WITH:***

- *European or Asian eye shapes*
- *Hooded or mature eyelids*
- *Deep-set eyes*

- *Straight or downward-growing lashes*
- *Naturally curled lashes – from subtle to defined*
