## LED TUNNEL (7 COLOURS)

### FEATURES

Each of the 7 available lights provides specific benefits to the skin.

A serum or a facial mask can be applied before using the LED Tunnel.

Step 1: Cleansing  
(with one of our Yumi Skincare treatment)

Step 2: Apply the serum or mask

Step 3: Irradiation with the LED Tunnel

A typical treatment time is 15 to 20 minutes. However, the treatment time and light intensity should always be adjusted according to the client's skin condition.

### COLOURS

**Red light** : Whitens and renews the skin, improves pore roughness and treats microvascular dilation.

**Blue light** : Removes acne, reduces sebum levels, eliminates acne-causing bacteria and reduces oily skin.

**Green light** : It has a calming effect on sensitive skin.

**Yellow light** : For freckles, reduces skin redness, erythema, pigment.

**Cyan light** : Balances secretion, stabilizes the skin and controls fat.

**Violet light** : Treats acne and acne marks.

**Light cycle** : Circulation of seven colors: blemishes, freckles, tender skin and deep skin restoration.
