

DIX

HYBRID

THE HYBRID CONCEPT

The patented DIX Hybrid is an insulated Constant Volume Drysuit (C.I.V) with unique features. It is called Hybrid because of the fusion between a Trilam drysuit and an insulating undergarment. The entire suit is lined with a 3D Mesh lining fixed to the suit and works like the springs in a mattress, keeping the cold outer layer of the suit away from the body - at all times. This creates a constant volume of air around the body and insulates the body like a thermos. It means that this suit is very warm and does not require any thick and heavy undergarment.

INSULATION - It is all a matter of keeping a layer of insulating air between you and the cold water. The Patented 3D Mesh inner lining gets the job done because it works like a thermos bottle. It creates what we call a Constant Insulation Volume or C.I.V. at all depths.

VENTILATION - The Patented 3D Mesh inner lining provides unrestricted air flow and prevents trapped air. It makes buoyancy control easier and controls the inner climate. It also dries out faster after every dive.

CONDENSATION - The constant distance and unrestricted air flow provided by Waterproof's 3D Mesh inner lining keeps moist air away from your body. As a result you will feel dry and warm. The 3D Mesh lining does not absorb any liquid and will stay dry.

PRESSURE DISTRIBUTION - The 3D Mesh has exceptional resistance to pressure. It provides real pressure distribution and keeps the distance constant to the outer shell. This virtually eliminates squeeze and cold spots.

ADVANTAGES

The Hybrid concept delivers several unique advantages not to be found in any other conventional drysuit.

QUALITY IN DETAILS

Waterproof remains the leading suit producer in the diving industry by keeping up with the latest technology. It is really all a matter of material development and keep focusing on improvement, from the composition of the suit fabric to the softness of the velcro tab holding the cuff. The DIX have several new features based on new available materials.

TECHNICAL SPECIFICATION

Strong 10-Butyl layer Tri-Lam fabric | 3D Mesh 50D Inner lining | Anatomical Sculpting | SI TECH Quick Neck system | SI TECH QCS Ring System | Silicone Neck Seal and Silicone Wrist Seals | Warmneck | Dual Convertible Power Pockets with D-Ring and Cord Loops | Anatomical Kevlar® Reinforced Boot | Kevlar® Reinforced Knee Pads | Heavy Duty Zipper Cover | Anti-slip seat | SI TECH Valves | Warm Cuffs | Integrated Suspenders | Moulded Hook and Loop Fastener Tabs | Including a H1 7mm H.A.V.S Hood, Drybag and a spare set of WP Silicone Seals | Plastic Free Packaging

Art No: Men's 672-1, Ladies 672-2
