

WATER
PROOF

D7X
NYLOTECH

BEST FRONTZIP EVER

Since it's introduction the Waterproof D7 has been the prime choice of drysuit within the advanced diving community. Even though the Waterproof D7 was a modern and extremely well performing drysuit, the R&D at Waterproof decided to give it a major overhaul. Changes were made to make diving in challenging environments a more pleasurable and effortless experience.

FABRIC ENHANCEMENT

After 35 years of experience in producing diving suits, Waterproof has accumulated a wealth of knowledge about different materials, rubber compounds, fabrics and adhesives. All that knowledge has been combined in Waterproof's latest dry suit material, the NyloTech. NyloTech, a new material developed to be softer, yet more resistant to abrasion. NyloTech has been abrasion tested (200.000 rubs) by the Martindale Method according to SS-EN ISO 12947-2:2017.

PERFECT FIT

A reshaped and slimmer fit resulting in a less bulky drysuit. A new longer and curved zipper, placed higher up on the shoulder to enhance upper body movement as well as providing effortless donning and doffing in an effort to boost the overall diving experience.

TECHNICAL SPECIFICATION

Strong, Flexible and Durable NYLOTECH Tri-Lam | Anatomical Sculpting with a slimmer fit | SI TECH Quick Neck | SI TECH QCS Ring System | Silicone Neck Seal and Silicone Wrist Seals | Warmneck | Dual Convertible Power Pockets with stainless Steel D-Ring and Cord Loops | Anatomical Kevlar® Reinforced Boots | Kevlar® Reinforced Knee Pads | Telescope Torso | Long and Curved Dry Zipper | Heavy Duty Zipper Cover | Anti-slip seat | SI TECH Valves | Warm Cuffs | Integrated Suspenders | Moulded Hook and Loop Fastener Tabs | Including a spare set of WP Silicone Seals | Plastic Free Packaging
