

#### Key Features

- Adjustable forehead brace reduces pressure on the bridge of the nose and provides a custom fit for each patient
- Soft silicone cushion makes it comfortable for patients even for long-term therapy
- Built-in chin flap eliminates need for chin strap
- 360 rotating swivel allows clinician to select the most appropriate tube position
- Easy to use and comfortable headgear
- 100% latex free

## Utopia AV & NE

### Utopia Disposable Full Face Mask

Affordable, comfortable, quality

The Utopia AV & NE are disposable full face masks designed for providing non-invasive ventilation or pressure support therapy. The Utopia AV features an anti-asphyxiation valve that allows for access to room air if pressure decreases. The Utopia NE incorporates all of the comfort and features of the Utopia AV, but eliminates the anti-asphyxiation valve, making it suitable for use with ventilators equipped with an active safety valve.
